I will never forget stepping foot onto the campus for the first time. Everyone was so friendly and welcoming. And that's something that I'm still astounded by to this day. It really feels like everyone is so happy to be here.

Within a few hours, I had fallen in love. I left the Open Day starry-eyed, telling my parents that I had to study at DMU. It completely changed my whole outlook on universities and I just had a really good feeling about it.

Why choose DMU?

Teaching and learning

At DMU, we call ourselves 'The Empowering University' because our supportive and nurturing community of academics, students and advisers will empower you to realise your dreams.

Our courses are carefully designed and taught by expert academics to help you gain the skills needed to enter today's competitive jobs market and succeed in your career.

We are innovating the way we teach with Education 2030, our new student-centred approach to learning. For most of our courses, you will study one module at a time instead of several at once, allowing you to focus on each topic in depth and form a close sense of community as you study with the same group of coursemates and tutors for each block.

See pages 12-13 for more information.

Your career

Gaining your degree is a stepping stone to landing your dream career, and our award-winning careers support and employability service, DMU Works, is here to open doors for you.

Our careers commitment means you can access guaranteed work experience opportunities, flexible support tailored to your needs, placement years that count towards your degree and unlimited digital tools.

And, unlike many other universities, we offer lifelong support and opportunities to all DMU graduates. That expert advice has helped previous graduates forge successful careers at places such as the BBC, NASA, Gucci, HSBC, Nike, BMW, Disney and the NHS.

Find your new beginning

Exploring your university options means you are taking the first steps towards a new future where you can explore a subject you're passionate about, enhance your employability, gain independence, enjoy new experiences and find the people who will push you to achieve things you never thought you could.

To help you on your journey, we've created an online toolkit full of great content, including live streams, student vlogs, a breakdown of the application process, and information and advice on why you should apply to university. Our expertise on a range of essential topics is also available to you on-demand with DMU Insights.

"Having been born and raised in Leicester, I was keen to stay in the city and always thought DMU looked colourful and inviting. I'm the first in my family to decide to go to university, and I will admit that I was initially quite nervous. I didn't know exactly what to expect.

However, speaking to lecturers and students at the DMU Open Day put my mind at ease, and coming here was a no brainer for me."

Chloe Brightwell, Human Resource Management BA (Hons)

Leicester – a city for students

DMU is in the heart of Leicester, a progressive and diverse city rich with history, a great choice of shops, bars and restaurants, and a lively mix of music, sport and culture. See pages 14-15 for more information.

Accommodation

After a day of studying and socialising, you need a place to call home. We'll help you find your perfect space, with all of our accommodation just a short distance from campus and Leicester's attractions. There's a wide range of halls with thousands of rooms available. DMU-sourced halls are modern and secure, with the option of en-suite bathrooms. See pages 20-25 for more information.

Find your people

You can be involved with something amazing while at DMU and make friends and memories that will last a lifetime. With over 200 groups, societies and sports teams, plus volunteering groups, DMU has something for everyone. Join our **2023 Applying to DMU Facebook Group**, where you can ask us any questions and connect with other DMU applicants looking to study at the same time.

Travel opportunities

Our award-winning DMU Global scheme can enhance your studies, broaden your cultural horizons and develop the skills most valued by employers. See pages 26-27 for more information.

Our campus

DMU's stunning campus is designed to be compact, safe, stimulating and a place where you'll feel at home. Being a campus-based university in the city centre also means everything's easily accessible.

Sustainability

We value sustainability and are the only UK university to be named a global hub for one of the United Nations (UN) Sustainable Development Goals. Alongside being in the top 10 per cent of institutions in the world for sustainability in the first-ever Times Higher Education University Impact Ranking, we were also awarded 4th place in the People and Planet University League 2021/22, which ranks institutions on their sustainability performance.

Health and wellbeing

We're committed to creating an environment that focuses on student health and wellbeing, helping you to live a healthy, happy and productive life. Our dedicated student support team can offer help with issues students might face before, during and after their studies.

Students can benefit from help with mental health, counselling, religious facilities and resources, disability support and a medical centre on campus. See pages 32-33 for more information.

Welcome to DMU

When you choose to study at university, it's a decision that says you're ready to invest in your future, your career and your community. Therefore, the right university should support you to build the knowledge, skills and confidence you need to achieve your dreams and become exactly the person you want to be.

That, I believe, is exactly the type of environment we've built at DMU. We have a special energy on our campus, created by our people and the sense of close community they foster. We know that when we work together, we can collectively achieve more.

We call ourselves 'The Empowering University' because we empower students from all backgrounds to achieve incredible things, especially in their careers. Our award-winning careers service, DMU Works, will help open doors for you – connecting you with employers and developing your employability skills to ensure you're work-ready.

DMU has a history of teaching and supporting talent, with our first classes held in a former warehouse more than 150 years ago. From those small beginnings, we're now a global institution. Much like our campus – where buildings range from the medieval to the 21st-century – we're steeped in rich history while always looking to the future.

Our inclusive approach to learning, Education 2030, is DMU's new way of delivering student-centred teaching for the majority of our courses, focused on providing the excellent experience you deserve and the positive outcomes you expect. It also means that most students will study one module at a time for seven weeks rather than four at once, which is often the case. You'll be with the same group of coursemates for each intensive block, so you'll really benefit from a close feeling of belonging and encouragement built into your academic studies.

Above everything, we value equality for all. Our home city of Leicester is diverse, multicultural and full of life – it's somewhere you can find your people and your place in the world. We also collaborate with our local, national and international communities to create a fairer and more sustainable society. And so, if you decide to join us, know that you'll not just be gaining a high-quality degree, you'll be joining a team.

I wish you every success with your choices and your exciting new future.

Professor Katie Normington
Vice-Chancellor

My journey towards university started at a crossroads, between the direction my family thought I should take and the future I saw for myself. I know you'll be making these big decisions too, so I'm proud to tell you I was brave enough to take the path I believed I would succeed in.

When I visited DMU for the first time for my audition – to study dance – it was literally the life I had imagined. Everyone was so friendly, and I just knew I would find a new home here. It's been everything I hoped for and more – from my personal tutor who inspired me to strive for nothing less than my potential, to my flatmate who convinced me to go to the hip-hop society taster where I met my dance crew.

Because they believed in me, I could believe in me. And now, due to the support I have received, dance has become my life: I'm doing a master's with a professional company and have performed across the country and abroad.

Choosing this path was a big move, but coming to DMU brought me to the most amazingly talented and caring people that I can truly call my family. I hope you'll find your family here, too.

Kadafi Mulula
Dance BA (Hons)

DMU Fashion graduate designs lingerie worn by Billie Eilish in iconic shoot with Vogue

Contour Fashion graduate, Tilly, had no idea she was designing for chart-topping singer-songwriter Billie Eilish when she was first approached by Vogue through her lingerie brand on Instagram.

The singer's outfits featured Tilly's black and dusky pink suspender belts in satin in a shoot revealing a new look that went viral.

Tilly said: "I wouldn't be where I am today without studying Contour Fashion at DMU. I absolutely loved my degree. We had lots of one-to-one support, the course has amazing industry connections and it was completely invaluable for learning the intricate techniques required for lingerie design."

Tilly Tomkins

Your career

What you learn in books is just the start. Our award-winning careers support and employability service, DMU Works, is here to open doors for you and help you find your dream career.

Our award-winning careers commitment provides you with guaranteed work experience opportunities, flexible career support tailored to your needs, placement years that count towards your degree and unlimited digital tools.

Our offer doesn't just exist while you study with us – we offer lifelong careers support to all DMU graduates through opportunities such as networking events, recruitment fairs and expert one-to-one advice, drawing on our wealth of great partnerships and employer networks across Leicester and beyond.

In 2021, we were awarded a prestigious Times Higher Education (THE) Award for Outstanding Support for Students in recognition of an initiative to help students from ethnic minority groups gain job confidence. We were also ranked among the best universities in the country for supporting students to improve their career prospects in the Whatuni Student Choice Awards – voted for by students themselves.

Earn while you learn

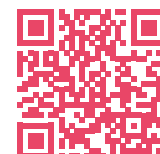

Our campus-based recruitment agency Unitemps offers our students a range of full-time and part-time opportunities, so you can earn flexibly alongside your studies.

Our approach works

Our graduates successfully secured jobs with organisations including Warner Bros, the BBC, Gucci, BMW, NASA, the NHS, Disney and IBM.

Our careers commitment offers:

- Guaranteed work experience opportunities for all students.
- Flexible support tailored to your needs, including placement years that earn academic credit towards your degree, skills workshops and masterclasses linked to your course.
- Unlimited access to digital tools including LinkedIn Learning courses, practice tests and interviews, self-assessments and personalised CV feedback.
- Industry experience through placements, internships and employability mentoring at companies such as ASOS, Disney, HSBC, KPMG, L'Oréal, Microsoft, NHS, Pfizer and Rolls-Royce.
- Opportunities to work on live briefs and take part in real industry showcases, such as Graduate Fashion Week, Congress to Campus and the international Formula Student competition at Silverstone race track – to name a few!
- Real-world experience and teaching by academic staff, guest speakers and lectures from inspiring industry leaders.

Education 2030

We want to ensure you have the best learning experience possible, which is why we have developed an innovative and inclusive approach to learning known as Education 2030.

This is DMU's new way of delivering student-centred and future-proofed teaching and learning and has been developed based on student feedback. It means that the majority of our courses will be delivered in a 'block' format, focusing on one subject at a time.

As a result, you will benefit from a straightforward timetable that gives you time to absorb and engage with learning materials in depth, faster assessment and feedback, and the opportunity to work closely with your tutors and coursemates to get the support you need.

All of our courses are taught by passionate and enthusiastic lecturers, several of which have excelled in the National Teaching Fellowship Scheme – the most prestigious award for excellence in higher education – while our courses are all carefully designed to help you gain the skills needed to enter today's competitive jobs market.

Not only will you have more time for your studies, but you will also have more free time to enjoy all the other aspects of university life with a better study-life balance.

DMU is one of the only universities in the UK to teach in this way, and from those who do, it has been proven to lead to better results and learning outcomes.

Many of our courses are accredited by professional bodies, meaning your learning is informed by current industry practice and gives you significant exemptions from professional qualifications once you graduate.

Leicester – find your new home

When you're not busy learning, you want life, and Leicester has everything you're looking for and more.

A big city on your doorstep

We're a campus-based university in the city centre, with the hub of activity in Leicester right on your doorstep – and we're one of the few universities in the UK where you're getting the best of both worlds. Leicester has been named the fourth most vibrant city in the UK, putting it ahead of the likes of Bristol, Edinburgh, Leeds and London (Top Cities Vibrancy Report, 2022), as well as the best city in the East Midlands to live and work (Good Growth for Cities Index, 2022).

A city for your career

Leicester is an excellent place to find work and has been named among the country's start-up hotspots (Capital on Tap), with DMU named one of Britain's top 10 universities for the most student and graduate start-ups. Leicester has also been named the UK's third most progressive city in tackling social and environmental issues (Bankrate UK).

It's home to major employers such as Caterpillar UK, Dunelm, E.ON Europcar Group, IBM, Joules, Mattioli Woods, Next and PepsiCo. DMU students can get a helping hand to kick-start their careers as part of the Leicester1000 initiative, which connects graduates with highly skilled jobs offered by DMU's employer network in the city, and through which many of our graduates have found professional roles with leading companies in Leicester.

A city with links

Leicester's central location means easy connections to UK cities and airports and is only an hour away from London by train.

A city rich in cultural diversity

Famed for diversity, Leicester is home to one of the biggest celebrations of Diwali outside of India. It's an inclusive city with a long history of welcoming a variety of ethnic communities and religious faiths.

Eating out in Leicester can feel like travelling the globe, offering bars, shops and restaurants influenced by tastes around the world, plus an array of coffee houses and lunch spots, comprising independent local vendors and your favourite restaurant chains.

A city for students

Arts and culture are renowned across our city, home to the biggest comedy festival in the country, live performances at Curve theatre, plus the Phoenix and Showcase cinemas.

Leicester's Highcross offers a great shopping experience, and the Lanes – a maze of quirky and Instagrammable streets – complements this with a wealth of independent options. And, as a DMU student, you will have access to a range of discounts and offers to help make the most of the city.

Home to FA Cup-winning Premier League football club Leicester City, ten-time rugby union champions Leicester Tigers, one of the UK's most successful women's hockey clubs, basketball side Leicester Riders and Leicestershire County Cricket Club – all partners of DMU – sports fans will be spoiled for choice.

Our campus and facilities

You work best where you're happy, safe and inspired.

We've invested in a stunning campus in the heart of Leicester, where you'll get the best of both worlds – a compact, accessible and safe space to live and study with convenient access to accommodation, shopping, nightlife and all that's on offer in the city centre.

The centrepiece of campus is the award-winning Vijay Patel Building, which houses our art and design courses in a space as creative as the staff who teach there and the students who study there.

Our Hugh Aston Building – home to business and law – has just undergone a new £5.5 million extension called The Yard.

Inside our magnificent 19th century Hawthorn Building you'll find modern facilities designed to replicate current practice in health and life sciences, while the Queen's Building boasts industry-level video, audio and radio production suites to support our media students.

The refurbishment of the picturesque Leicester Castle provides our business students with a mixture of historic and modern learning environments.

"I knew from my first proper day at DMU that it's where I was supposed to be. The art and design facilities are amazing and the campus is a very inspirational and motivating place to be."

Sarah Patel,
Photography and Video BA (Hons)

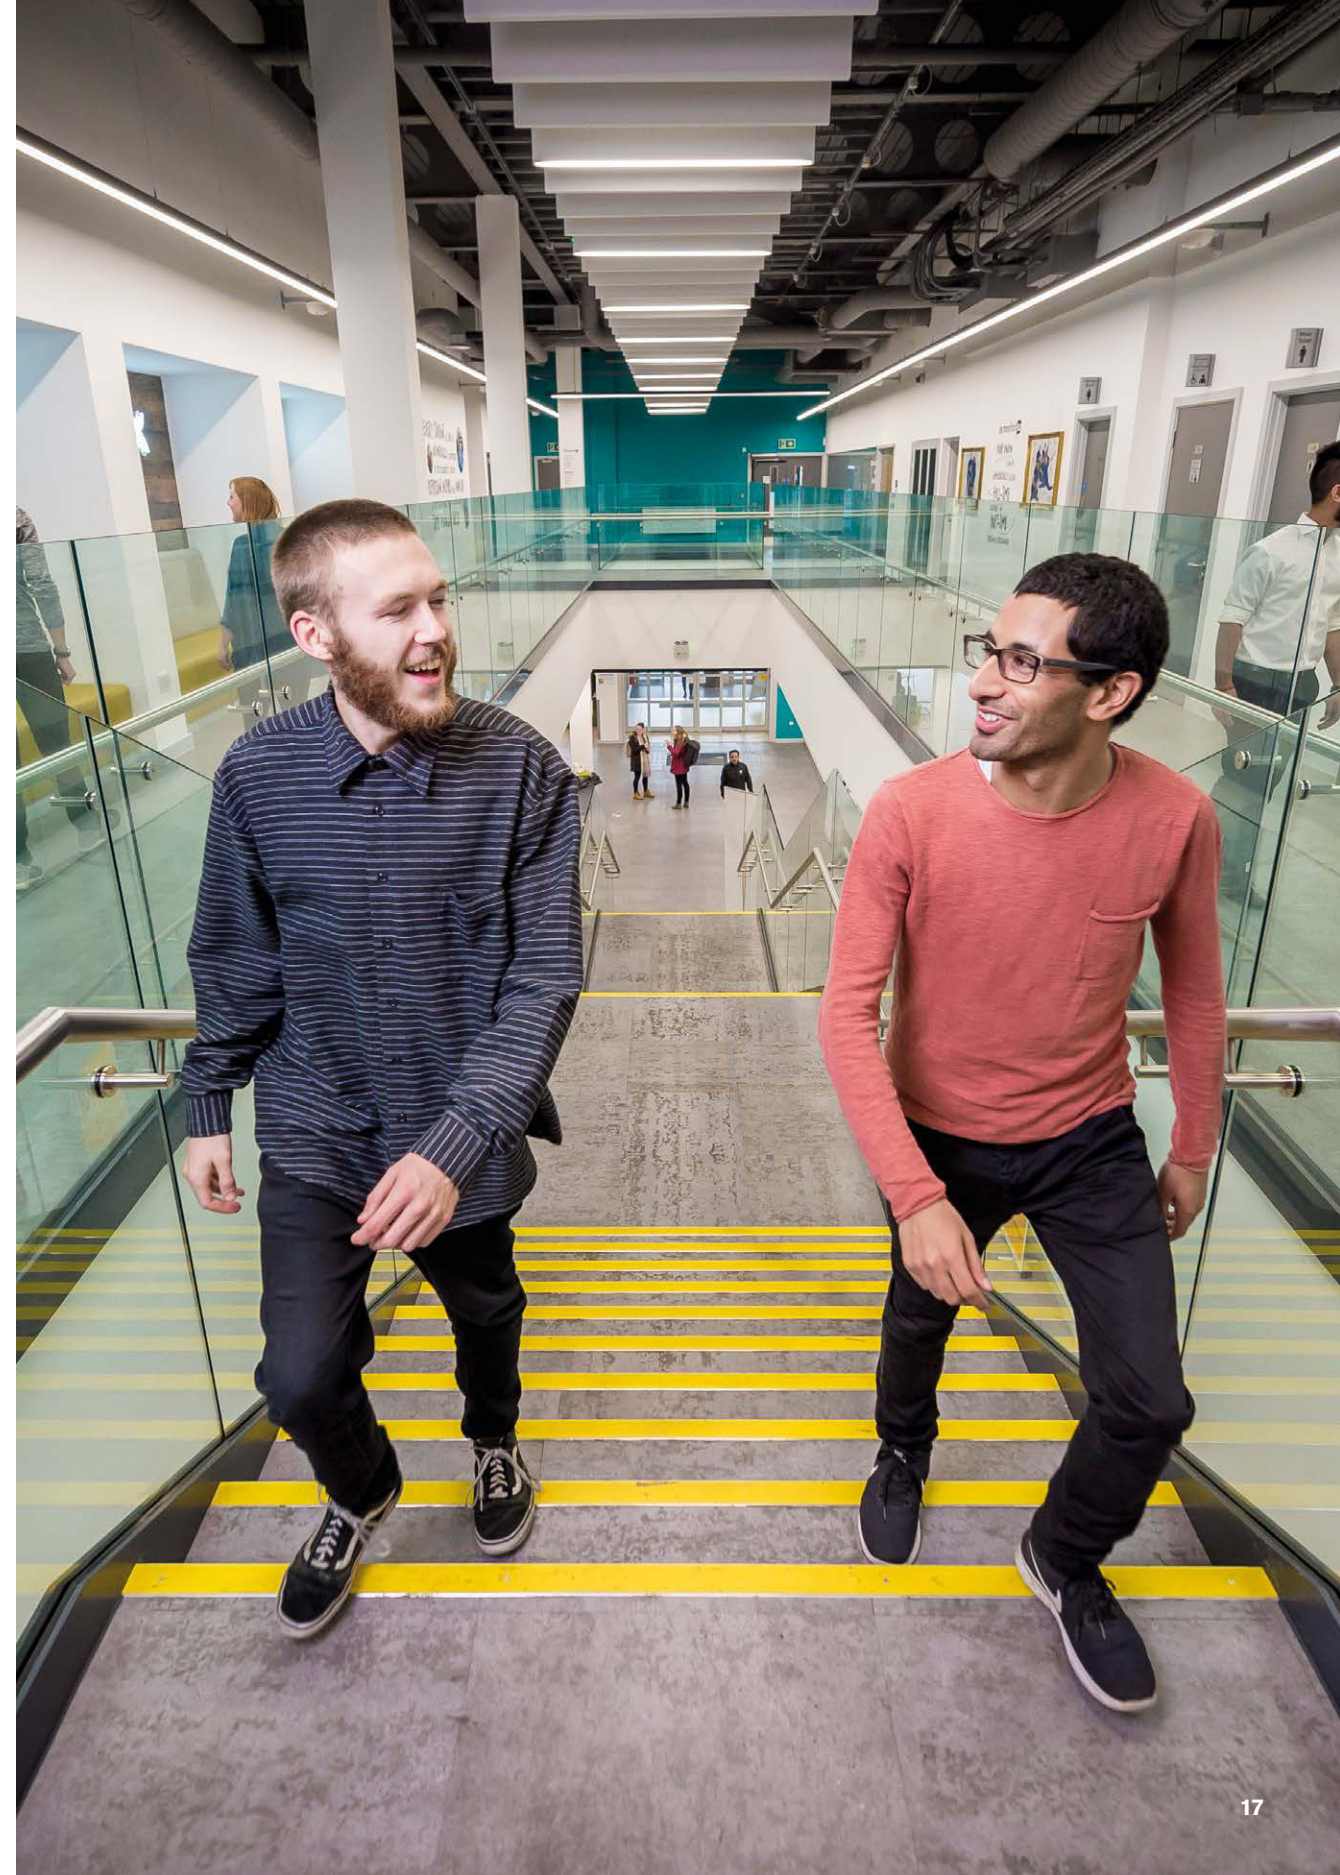

Life on campus

Campus offers loads of great places to eat, drink and relax, including the popular Riverside Café, which specialises in vegetarian and vegan cuisine and overlooks the River Soar, and the spacious Food Village, where you can order food from all over the world. Our Campus Centre is the home of De Montfort Students' Union, enhancing your student experience with extra break-out spaces to study and chat.

Our Queen Elizabeth II Diamond Jubilee Leisure Centre boasts a 25-metre swimming pool, climbing wall, eight court sports hall, fitness suite, dance studio and a packed programme of workout classes for all fitness levels.

The Kimberlin Library offers a space where you can work and study, with access to a vast range of print materials, guidance from staff and facilities for individual and group work. Computer stations, laptops, plasma screens and assistive technology are also available.

We will support you to use a range of learning technologies confidently and offer access to LinkedIn Learning, Microsoft 365 and study support software through our Digital Student Skills Hub. We also provide online tools to support your studies with an extensive collection of resources, including e-books, specialised databases and electronic journals and films that can be remotely accessed.

Industry-standard facilities

From laboratories, art studios and study spaces to seminar rooms and lecture theatres, we prioritise modern technologies and equipment to prepare students for the future. Here is a flavour of just some of the course facilities our students can craft their skills in:

Our award-winning Vijay Patel Building inspires creativity across all art and design courses with specialised studios and industry-standard workshops for Architecture, Fashion and Textiles, Visual Arts and Design.

Make your performance ideas a reality with the fully equipped PACE Building and Campus Centre that house flexible performance spaces, spacious studios and rehearsal rooms.

Simulate what it's like to work in the financial industry with our Trading Room, complete with financial software reporting real-time stock and bond prices.

Practise legal skills in our mock courtroom and client interview room.

Our multimillion-pound media studios are equipped with editing suites, TV studios, and digital and analogue radio stations.

Our computing laboratories contain high-specification, specially customised PCs, Alienware computers with i7 processors and a range of sensors, actuators, and controllers to support various practical activities.

Explore our mock crime scene house for training in crime-scene processing, evidence recovery and DNA profiling.

Aeronautical Engineering students can test their piloting skills with the industry-standard flight simulator AIRFOX DISO, and our purpose-built subsonic wind tunnel for experimental investigation of aerodynamics.

Gain hands-on patient care and ward experiences with our state-of-the-art midwifery suite, radiography suite and bespoke paramedicine spaces.

Utilise modern laboratories for analytical chemistry, formulation and microbiology in our 19th century Hawthorn Building.

Accommodation

Where you live is one of the most important parts of your university experience, especially in your first year, which is why all of our accommodation options are within walking distance to the city centre and campus.

DMU looks to provide accommodation that caters for what matters most to our students and their parents and carers. We aim to find every new student a safe and affordable place to live where they feel at home.

All DMU sourced rooms are modern and self-catered, with single-sex options available and many featuring en-suite bathrooms, social spaces, on-site gyms and internet access. There's also an opportunity to handpick your own room. Bede Hall offers fully adapted rooms for wheelchair users, including kitchens.

We understand that safety is key, so all DMU-sourced halls have on-site or on-call security, on-site managers, and CCTV or electronic door entry.

Flexible contracts are available and weekly prices vary depending on the accommodation. Halls and guideline prices are from 2022/23 entry and are correct at the time of going to print. The prices listed are an indicator, and the 2023/24 entry fees are subject to change, so please check our website for the latest information.

All DMU-sourced halls of residence are signed up to the Universities UK student accommodation code of practice. University-sourced, privately managed halls are signed up to the equivalent Accreditation Network UK/Unipol national code, which commits providers to maintain professional benchmark standards for large student developments.

Bede Hall

Owned and managed by DMU

Walking distance from campus and city centre:
10 minutes

Rooms available: 227

Flat size: Seven, eight, nine and 10 bedrooms, each with a shared bathroom and shared kitchen facilities

20 minutes

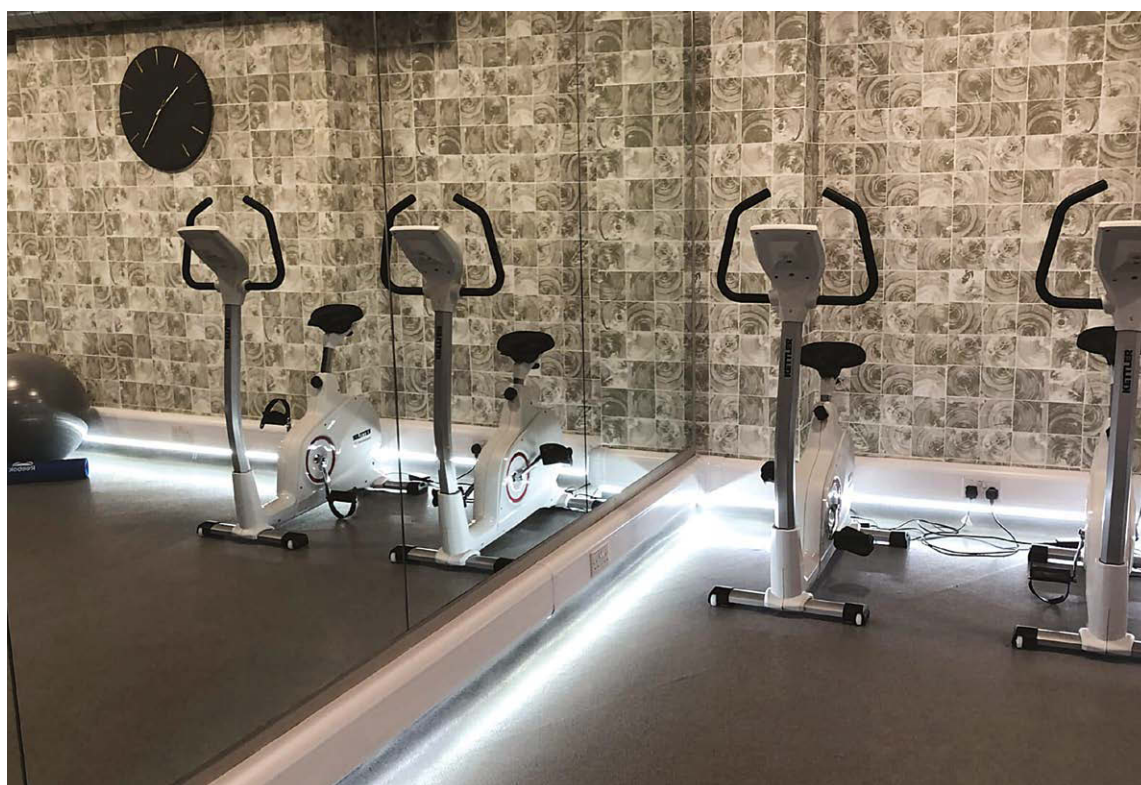

Rooms available: 90

Flat size: Six-bedroom houses, each with a shared bathroom and shared kitchen facilities

En-suite: No

Cleaning service: Yes (shared bathrooms only)

Guideline price: £105 per week

"As you ease into DMU, there is a sense of community. Every person I met had an impact on my university experience.

For me, it started in the student halls as I got to know everyone from the caretaker and cleaning staff to the receptionists and security. It was the little things they did that made all the difference – things like they would help me with my post and make sure I knew in advance when fire alarm tests were going to happen."

Chris Samuel, Fine Art MA (Hons)

International experience

There's more than one way to see the world, and DMU Global is ours: an award-winning scheme designed to enhance your studies, broaden your cultural horizons and develop the skills most valued by employers.

We know the chance to travel further afield as part of your university experience will enrich your employability and learning for life.

Through DMU Global, we offer students a wide range of exciting international experiences. For current students, locations include the USA, South Korea, China, Guatemala and Europe, where they can explore movie fandom, volunteer for sustainable development projects or visit the headquarters of some of the biggest tech companies in Silicon Valley.

Studying at DMU also provides opportunities for transnational education, which is the chance for you to carry out your studies at one of our global campuses.

We're also proud of our international relationship with the United Nations, founded on our commitment to championing the UN's Strategic Development Goals (SDGs). Giving students the chance to get involved in the promotion of international peace and justice.

Travel abroad with your course

Many of our international experiences are delivered by academic staff and are a great way for you to internationalise your degree, regardless of your previous travel experience. DMU Global provides financial support to all students and practical advice to help you prepare for your trip.

Since its launch, more than 17,000 students have gone overseas with DMU Global, visiting more than 65 countries and experiencing new cultures and different educational environments.

Stand out on a global stage

Employers tell us how much they value graduates with international awareness and the ability to co-operate and communicate across cultures. With DMU Global, you could receive funding to complete a work placement overseas, which offers you the chance to understand how business works in a global context.

Study on exchange

DMU has links with a range of universities worldwide, giving undergraduate students the chance to spend a year studying on exchange as part of their degree. Destinations have included Europe, the USA, Canada, Japan and South Korea. As well as experiencing a new culture and enhancing your studies, you'll receive formal recognition as part of your degree title to help you stand out in the job market.

International insight on your doorstep

You don't need to travel overseas to have an international experience. We offer a wide range of on-campus and online opportunities for you to develop your intercultural awareness and language skills.

Studying at DMU also provides the chance for you to carry out your studies at one of our partner institutions in a different country, so students can fulfil their goals wherever they may be.

Student life at DMU

Students' Union

When it comes to finding your people, De Montfort Students' Union (DSU), located at the centre of campus, offers more than 200 student groups and societies, close to 40 sports clubs, numerous volunteering groups and Demon Media – all of which give you a chance to be involved with something amazing while at DMU and make memories that will last.

As your students' union, DSU is here to represent your academic interests and amplify your voice. It's led by a team of Executive Officers and Liberation Representatives, all current or former DMU students. DSU also has more than 400 course representatives who are in place to represent your course's interests.

DSU is happy to help you with course queries and matters related to finance, wellbeing, and housing – they're here to make sure you feel safe and welcome, and it's all completely free and impartial.

They host regular 'Give It a Go' events for you to try different activities, learn something new, meet new people and get involved. Every DMU student is automatically a member of DSU, so once you're settled into your new surroundings, why not come and say hello?

Helping the local community

Students can volunteer through our award-winning DMU Local initiative, which uses the knowledge and skills of students and staff to help the local community while gaining valuable life skills and experience on their CVs.

Our students have enjoyed opportunities to run computer skills classes for older people, support local schools and youth clubs and cook meals for vulnerable community members. They have also volunteered worldwide, including supporting refugees across Europe and helping disadvantaged communities in India and the US.

"One of the best things I did at university was volunteer as a Code Club ambassador through DMU Local. I got to teach local school children how to code and helped to prepare them for the FIRST LEGO League. Our group took second place in the regionals and it was a really rewarding experience.

At every interview I went to for a graduate job, they asked for examples of extra-curricular activities, so I could see that my volunteering experience was a key aspect in securing my role."

Sport

DMUsport has something for everyone, whether you're trying an activity for the first time or representing at national competitions, with over 30 student-led sports clubs and opportunities to develop your skills on and off the pitch, as a player, student leader or volunteer.

Our student-led DMUactive programme offers an extensive range of free activities from yoga to basketball, internal competitive leagues and one-off events such as glow-in-the-dark badminton.

Leicester is a city with sporting achievements to be proud of. Our links with clubs such as Leicester City Football Club and Leicester Tigers generate placement opportunities for students, and our ticket offers mean you could see some of the world's best players just minutes from campus.

DMU's Queen Elizabeth II Diamond Jubilee Leisure Centre has a 25-metre swimming pool, sauna, 13-metre climbing wall, sports hall, free-weights area, fitness suite and a comprehensive fitness programme. Our Beaumont Park facility boasts a clubhouse, two all-weather 3G artificial pitches, two FA-standard grass pitches and floodlights for night games. The Watershed, our indoor training environment, offers land training facilities for rowing and a strength and conditioning gym for selected club members.

"I looked for a platform to talk about the issues that I had faced as a visually impaired person and once again, DMU delivered for me – this time through its radio station, Demon FM. I formed strong friendships here and through my show, One Man and His Dog, I shared a lot of laughs and even interviewed guests about rights for disabled people."

Charles Bloch, Digital Marketing and Social Media BA (Hons)

Healthy **DMU**

We believe your university experience should support you to meet your full potential.

We work to create an environment that focuses on your health and wellbeing so that you can live a healthy, happy and productive life.

The Student Living Index 2021 saw Leicester ranked the fifth best city in the UK for university mental health support, and we are proud to have won the 'Outstanding Support for Students' prize in the 2021 Times Higher Education awards.

If you need support during your studies, here's how we can help:

Mental Health and Wellbeing support

Our wellbeing team can provide you with someone impartial to talk to in confidence and help you activate your own resources to overcome difficulties.

The mental health inclusion team offers practical advice and support in managing mental health difficulties, including assessments for teaching adjustments, accessing local services such as the NHS and signposting to counselling services.

Disability support

Our disability advice and support service offers tailored support to students with physical and sensory disabilities, medical conditions and Specific Learning Differences (SpLD), including help with applying for the Disabled Students Allowance (DSA).

Student Gateway

The Student Gateway provides a range of services in areas including student finance and welfare, jobs and careers, mature students and care leaver support.

 dmu.ac.uk/studentgateway

Mandala Project

We are committed to providing an environment free from harassment and discrimination. Our Mandala Project signposts students towards practical support if they experience such behaviours on campus, including sexual and domestic violence, forced marriage and coercive control, harassment and abusive language.

No Space for Hate

No Space for Hate signposts students towards practical support if they experience a hate incident linked to a protected characteristic such as race, religion, sexual orientation, transgender identity or disability.

Religious support

Our OpenFaith initiative encourages students of all faiths and no faith to celebrate diversity and humanitarian values. Spiritual facilities on campus include a prayer room, the Breathing Space and a chapel.

Healthy DMU Hub

The Healthy DMU Hub brings together a range of activities and resources to boost your health and wellbeing while at DMU.

Support for international students living in the UK

International Student Support

For international students, our dedicated support team is on hand to provide help and guidance before and during your time at DMU. The team runs our International Welcome Week, airport pick-ups and a 'buddies' scheme.

International Welcome Week

We host a week of events and activities to help you settle into life in the UK and make new friends. You can attend our welcome event, take a trip to a local attraction, and learn more about working in the UK, managing money and expectations at a UK university.

Fees and funding

Our fees ensure that students receive a high-quality and distinctive education while enjoying excellent facilities and a fantastic support network. Our international tuition fees are listed on our website, so please visit the address below for further information.

EU, other EEA and Swiss nationals will no longer be eligible for home fee status, undergraduate, postgraduate and advanced learner financial support from Student Finance England.

International students are required to pay 50 per cent of their fees in advance of registration. The easiest and quickest way to pay your fees is online.

Scholarships and bursaries

We offer a range of scholarships and bursaries to help students with the cost of international study so they can make the most of their time at DMU.

Religious support

There is a Christian prayer room and a Muslim prayer room (with washing facilities) on campus. Anyone can visit the on-campus chaplaincy for non-denominational religious support. The Christian chaplains and Muslim imam provide advice and guidance to students of all faiths and on matters relating to faith and religion, alongside spiritual, pastoral, moral and social care.

English language requirements

Should your course require any English language requirements we will inform you during your application process.

See individual course pages on our website for specific requirements.

Visa information

If you are not a British citizen, you will need permission to live and study in the UK. You can check if you need a visa or find out about the EU settlement scheme online.

Visit our website for the most up-to-date advice on visas – including any changes relating to the UK's withdrawal from the EU.

Joining the **DMU family**

Helping you adjust

Starting university is an exciting time, but being in a new place and getting used to a different chapter of your life may also seem a little daunting.

To help new students cope better with the challenges of academic study and independent living, we have a dedicated Transitions team in place.

Get to know us

Hear the latest from the DMU community on our social media channels. You can also join our **2023 Applying to DMU Facebook Group**, where you can ask us any questions and connect with other DMU applicants looking to study at the same time.

DMU for Life

Being a part of the DMU family isn't just about the years spent with us; we also encourage our alumni to be an active part of our global community. DMU alumni have lifelong access to support and networking opportunities as well as discounts and memberships on campus.

Open Days

University is your new beginning. Choosing the right one for you is an important decision and visiting us at an Open Day is the best way to find out what we have to offer. You can speak with our supportive community of academics and current students about their experiences, explore our award-winning campus and accommodation options and visit the multicultural and vibrant student city of Leicester.

Campus tours

If you are unable to attend an Open Day, we also offer campus tours which allow you to explore our modern, city-centre campus and chat to current students about what it's like to study at DMU.

Accounting and Finance

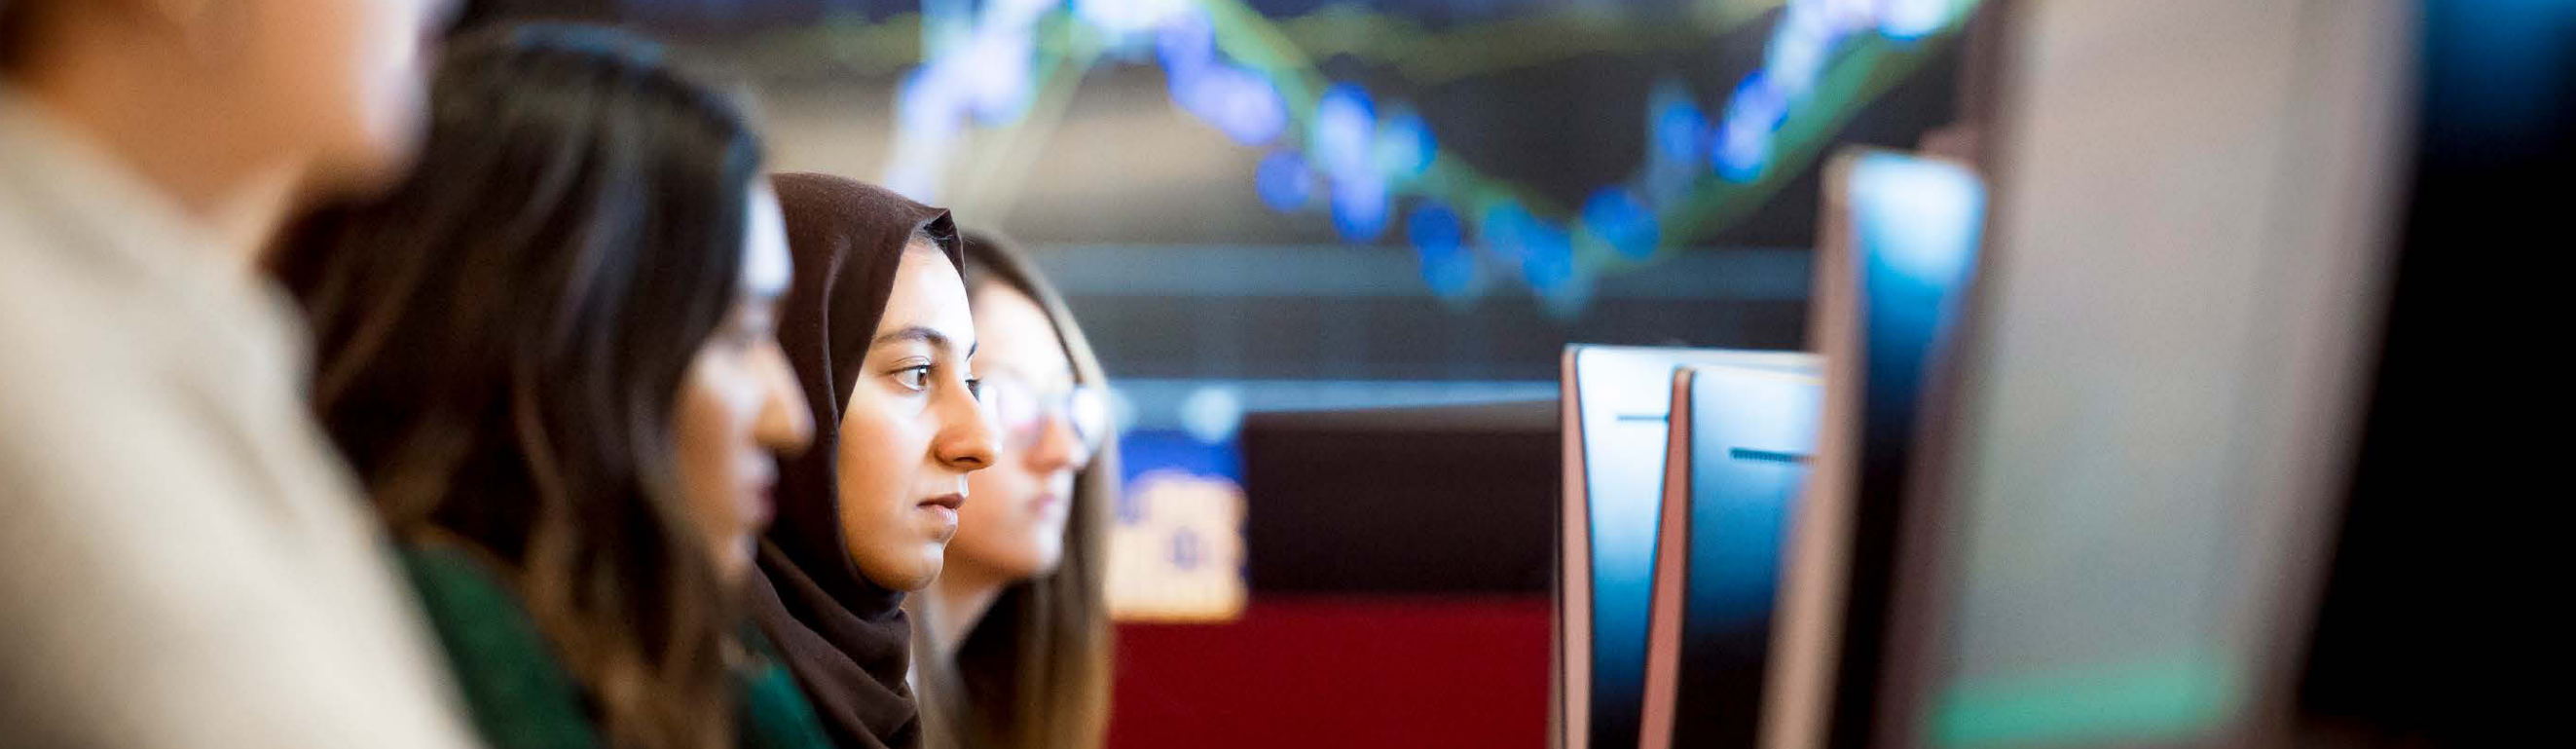

Course	UCAS points
Accounting and Finance BA (Hons)	112
Accounting with Business Management BA (Hons)	104
Finance and Investment BSc (Hons)	112

Education 2030

Our courses are carefully designed and taught by expert academics to help you gain the skills needed to enter today's competitive jobs market and succeed in your career. We are innovating the way we teach with Education 2030, our new student-centred approach to learning. For most of our courses, you will study one module at a time instead of several at once, allowing you to focus on each topic in depth and form a close sense of community as you study with the same group of course mates and tutors for each block. See pages 12-13 for more information.

Please note: Course information was correct at the time of going to print and is subject to review, so may vary. For the most up-to-date course information, a full list of modules, course duration and entry requirements visit our website. If a programme is not currently available to UK, EU or international students, this will be notified on the specific course page on our website.

Accounting and Finance

The Department of Accounting and Finance is taught by staff with a wealth of professional practice and academic experience, and many of our programmes have been awarded professional exemptions from one or more professional bodies*.

Our Trading Room will allow you to experience what it's like to work in the financial industry in roles such as trading, portfolio management, investment banking, corporate finance and financial or economic analysis.

Accounting and Finance BA (Hons)

Kick-start your professional accounting career on a course designed to develop industry-ready graduates, with a number of exemptions from professional body exams to speed up the process to become a qualified accountant. You will also have access to Bloomberg and Refinitiv (Eikon and Workspace) self-study certifications and their online training materials to enhance your skills.

Accounting with Business Management BA (Hons)

More than ever, the world needs flexible and prepared thinkers, ready to build financially robust businesses that are able to deal with the unexpected and cope in a crisis. This joint honours degree will build on strong analytical skills, exploring the economics of markets such as money, capital, derivatives and foreign exchange, and the theory of modern finance in business.

Finance and Investment BSc (Hons)

This course is a member of the Chartered Financial Analysts (CFA) Affiliation Program, and our curriculum prepares students to sit the CFA examinations to obtain one of the most reputable professional qualifications in the finance and investment industry. The use of industry-standard commercial databases and software, such as Bloomberg, Thomson Reuters Eikon, Matlab and Python, are integrated into teaching to bridge the theoretical and practical aspects of finance. Innovative modules will introduce you to new methodologies – such as artificial intelligence (AI) and financial applications, where you will gain hands-on experience using, evaluating and developing your own AI applications to solve real-life problems.

Careers and placements

Our award-winning careers service, DMU Works, can help you secure a placement through activities such as mock interviews and aptitude tests. We advertise posts in the private, public and not-for-profit sectors, including some international posts. You'll benefit from our close links with employers and professional accounting bodies and enhance your career prospects with visiting sessions by industry speakers and networking events. Our students have taken placements with companies including IBM, Lloyds Banking Group, Ernst & Young, Volkswagen Financial Services and the NHS.

Facilities

You will study in the modern Hugh Aston Building and The Yard, a new extension designed to enhance your learning experience with large and airy breakout spaces, a new Student Advice Centre and a top-floor balcony.

Depending on your course and module choice, you may be able to take advantage of the Trading Room. It offers access to the same information as leading decision-makers in finance, business and government, with industry-standard software to prepare you for the real world of finance and business. With access to real-time and historical data, you can gain practical insight into economic scenarios, analyse financial markets and interpret key news developments impacting the global economy.

You will also have free access to news, analysis and commentary from the Financial Times, the world's leading global business publication.

Accreditations

Depending on your module choices, you could gain up to the maximum of nine exemptions from the Association of Chartered Certified Accountants (ACCA) exams. You could also be exempt from the first eight exams with CIMA – a great start towards gaining your professional qualification and a wealth of industry knowledge.

Additionally, you could gain exemptions from the Chartered Institute of Management Accountants (CIMA), the Certified Practising Accountants Australia (CPA), the Institute of Chartered Accountants in England and Wales (ICAEW), the Institute of Financial Accountants (IFA), the Chartered Institute of Public Finance and Accountancy (CIPFA), the Chartered Insurance Institute (CII) and the Association of International Accountants (AIA).

*The number of exemptions awarded will be dependent on the programme and the combination of modules selected.

Architecture and the Built Environment

Course	UCAS points
Architecture BA (Hons)	128
Architectural Technology BSc (Hons)	112
Quantity Surveying and Construction BSc (Hons)	112

Education 2030

Our courses are carefully designed and taught by expert academics to help you gain the skills needed to enter today's competitive jobs market and succeed in your career. We are innovating the way we teach with Education 2030, our new student-centred approach to learning. For most of our courses, you will study one module at a time instead of several at once, allowing you to focus on each topic in depth and form a close sense of community as you study with the same group of course mates and tutors for each block. See pages 12-13 for more information.

Architecture and the Built Environment

The Leicester School of Architecture (LSA) has a 125-year history of nurturing the next generation of architects with a future-facing curriculum that focuses on the 'craft of making'. Our diverse community offers an atmosphere of open-ended enquiry and experimentation where you will be encouraged to challenge convention. Architecture is not simply about a building – it's a vehicle for changing the way we live. You will imagine buildings of the future that offer innovative solutions to the global climate emergency while addressing the social and cultural needs of local communities.

Architecture BA (Hons)

On this course, you will create innovative and sustainable architectural solutions to contemporary environmental challenges in order to create a fairer society on both a local and global level. The course is accredited by the Royal Institute of British Architects (RIBA) and the Architects Registration Board (ARB), ensuring the content you study meets and exceeds the criteria set out by these professional bodies, with students also exempt from RIBA and ARB Part I examinations.

Architectural Technology BSc (Hons)

This course focuses on the technological and engineering aspects of building design and construction, questioning the structure, materials and environment of both new and existing buildings. You will consider ways to improve the future performance of buildings and reduce carbon emissions and construction waste by making ethical choices. This course is accredited by the Chartered Institute of Architectural Technologists (CIAT) and the Chartered Association of Building Engineers (CABE).

Quantity Surveying and Construction BSc (Hons)

This course focuses on controlling and managing the costs of construction projects to enhance value for money. You could be involved with any stage of a project, from feasibility, design and construction, through to extension, refurbishment, maintenance and even demolition.

Facilities

Our award-winning Vijay Patel Building brings our architecture courses together into a contemporary setting.

You will benefit from our extensive range of specialist facilities such as multipurpose studios, CAD labs and workshops offering metalworking, woodworking, digital printing, water-jet cutting and prototyping. Industry-standard tools and simulation software include Thermal Dynamic Simulation, CostX and Building Information Modelling.

See a stunning showcase of the building at dmu.ac.uk/aad

Jessika Elalam, Architecture BA (Hons)

Careers and placements

Our courses are designed to give you the tools to enter the construction industry of the future. You can enhance your CV with support from local practitioners through mock interviews and mentoring and participate in volunteering and design competitions. You will develop consultancy team skills by working with students across our built environment disciplines as you will in professional practice.

We have excellent industry links that ensure you work on relevant projects and client briefs. Recent placements include Isherwood McCann Architects, David Wilson Homes, YMD Boon, Moss Architecture, Tim Adams Architects and rg+p.

Many of our graduates follow the conventional route to qualification and registration as architects, quantity surveyors or architectural technologists. Others use their degree to launch careers in related fields such as architectural conservation, urban design, research, planning, engineering and project management, or transition to postgraduate study. Recent employers include Heatherwick Studio, Make Architects and Shigeru Ban Architects.

Awards and showcasing

Become one of our award-winning students by entering prestigious competitions such as the RIBA President's Medals, in which DMU has a proud history of success.

You can develop your portfolio and gain industry exposure by showcasing your work. With our well-established links in the creative city of Leicester, students can exhibit at LCB Depot and Leicester Gallery. There are also opportunities to take your work to an international stage, with previous students showcasing at the UK Pavilion at Expo 2020 in Dubai.

Teaching expertise and industry links

You will be taught by academic staff and technicians who have worked in professional practice or are researching the latest developments in their sector, bringing this expert insight into your learning. Our excellent relationships with the Leicestershire and Rutland Society of Architects, RIBA East Midlands and Leicester City Council mean you can contribute to design and building projects in the city. You can also engage with the wider architectural community through guest speakers, including renowned architects and respected scholars.

Business, Entrepreneurship and Human Resource Management

Course	UCAS points
Business Management BA (Hons)	112
Business Entrepreneurship and Innovation BA (Hons)	112
International Business BA (Hons)	112
Human Resource Management BA (Hons)	112

Education 2030

Our courses are carefully designed and taught by expert academics to help you gain the skills needed to enter today's competitive jobs market and succeed in your career. We are innovating the way we teach with Education 2030, our new student-centred approach to learning. For most of our courses, you will study one module at a time instead of several at once, allowing you to focus on each topic in depth and form a close sense of community as you study with the same group of course mates and tutors for each block. See pages 12-13 for more information.

Please note: Course information was correct at the time of going to print and is subject to review, so may vary. For the most up-to-date course information, a full list of modules, course duration and entry requirements visit our website. If a programme is not currently available to UK, EU or international students, this will be notified on the specific course page on our website.

Business, Entrepreneurship and Human Resource Management

A good grounding in business is essential if you want a management career in the competitive global economy. Our lecturers have extensive experience, with many involved in consultancy and training with large international organisations in both the private and public sectors. This means that the latest industry developments and practices inform our teaching.

Business Management BA (Hons)

This highly practical course has been designed with the future in mind. Taking into consideration growing disciplines such as artificial intelligence, you will study several business areas that reflect the ever-changing needs of the market, including modules such as Digital Transformation and Innovation in Business and Ethical and Responsible Leadership.

Alongside the opportunity to take a year-long placement, you will also get a chance to gain real-time insight into companies like Amazon and Apple direct from executives who work there through integrated case studies and business simulations.

Business Entrepreneurship and Innovation BA (Hons)

This course will develop your entrepreneurial and creative skills and apply them to real-world situations. Taught by lecturers with industry experience, you will study core topics that cut across business and entrepreneurial practice. You'll be able to participate in a collaborative consultancy project with real businesses and simulate a new venture creation using SimVenture software. An optional final year module will allow you to create a compelling solution to a new business venture within a specific market and pitch your idea to a panel consisting of staff, experienced entrepreneurs and potential investors.

International Business BA (Hons)

Explore how organisations compete and co-operate in today's fast-paced and increasingly interconnected global market. This course focuses on organisational activity and the supporting regulatory, legislative and political environments that help facilitate trade between companies and across international boundaries.

Human Resource Management BA (Hons)

With this course, you will explore a wide range of issues raised by contemporary developments in areas of management, work and employment. You will have the opportunity to choose from two pathways, either the People Management Pathway or the Business Management Pathway. Depending on the pathway you choose your modules after year one will focus on your selected area of expertise, which will allow you to gain valuable and in-depth knowledge in these subjects. The course is designed around the purpose, values, specialist knowledge and core behaviours of the Chartered Institute of Personnel Development (CIPD).

Careers

Our award-winning careers service, DMU Works, offers exceptional career support, including professional work experience opportunities, one-to-one CV advice, interview preparation and employability mentoring – all tailored to your course. You can also benefit from guest lectures, work on live briefs, networking opportunities and access to our Enterprise Network, which helps aspiring entrepreneurs to turn an idea or vision into a business.

Facilities

You will study in the modern Hugh Aston Building, with access to the recently renovated Leicester Castle. Our facilities include IT labs, study suites and a learning zone, as well as The Yard, a new extension to the Hugh Aston Building designed to enhance your learning experience with large and airy breakout spaces, a new Student Advice Centre and a top-floor balcony.

Placements

Students have the opportunity to complete a year in industry before their final year of study. These placements are full-time, salaried jobs across large, medium and small organisations in a range of sectors. Recently, our students have flourished in roles at Pfizer, Walt Disney, the Government Economic Service, General Electric and PwC.

Accreditations

We are a Chartered Institute of Personnel and Development (CIPD) Approved Centre, and our programmes are accredited by the CIPD. Our human resource management students benefit from learning the latest professional developments and have the opportunity to pursue a degree pathway leading to associate membership of the CIPD (Assoc CIPD), giving you a competitive edge in the job market.

Computer Science and Informatics

If a programme is not currently available to UK, EU or international students, this will be notified on the specific course page on our website.

Computer Science and Informatics

Our courses combine excellent teaching with outstanding research to help solve the technological challenges faced by industry, commerce and society.

We have courses covering the fields of cyber security, software engineering, machine learning, robotics and artificial intelligence, data analytics and science, games production and programming, maths and ethical and social aspects of emerging technologies.

DMU has been named a gold standard 'Academic Centre of Excellence in Cyber Security Education' by the leading authority on cyber security in the UK, the National Cyber Security Centre (NCSC) - part of GCHQ. DMU is the first university in the East Midlands to achieve this prestigious status.

Applied Computing BSc (Hons)

Master key technical and practical skills in a wide range of computing specialisms, including computer technology, database design and development, internet technology, programming, systems requirement development and agile project management.

This course provides knowledge and skills for the modern, computer-driven workplace through combining traditional computing subjects with professional and work-related skills.

Artificial Intelligence BSc (Hons)

Combining a mixture of robotics, artificial intelligence and computer science, this course will develop the theoretical knowledge and practical skills you need to create smart solutions in commerce and industry.

Business Data Analytics BSc (Hons)

Develop your practical IT abilities, learn how to extract information from systems in business, government and society, expertly develop models and uncover previously unknown trends and patterns to support organisational decision-making. This course provides a broad understanding of information systems coupled with in-depth exploration of analytics knowledge and concepts.

Business Information Systems BSc (Hons)

Developed with industry partners, this course is tailored to meet the computing needs of commerce and industry. You will gain the theoretical knowledge and practical skills needed to work in the development, implementation and management of business computing projects. This course will develop your understanding of information systems, with opportunities to specialise in your individual areas of interest.

Computer Games Programming BSc (Hons)

This course helps prepare you for a technical career in the exciting creative games and entertainment industry, allowing you to develop industry-standard programming skills and explore developments in computer and network technology.

Computer Networks and Security BSc (Hons)

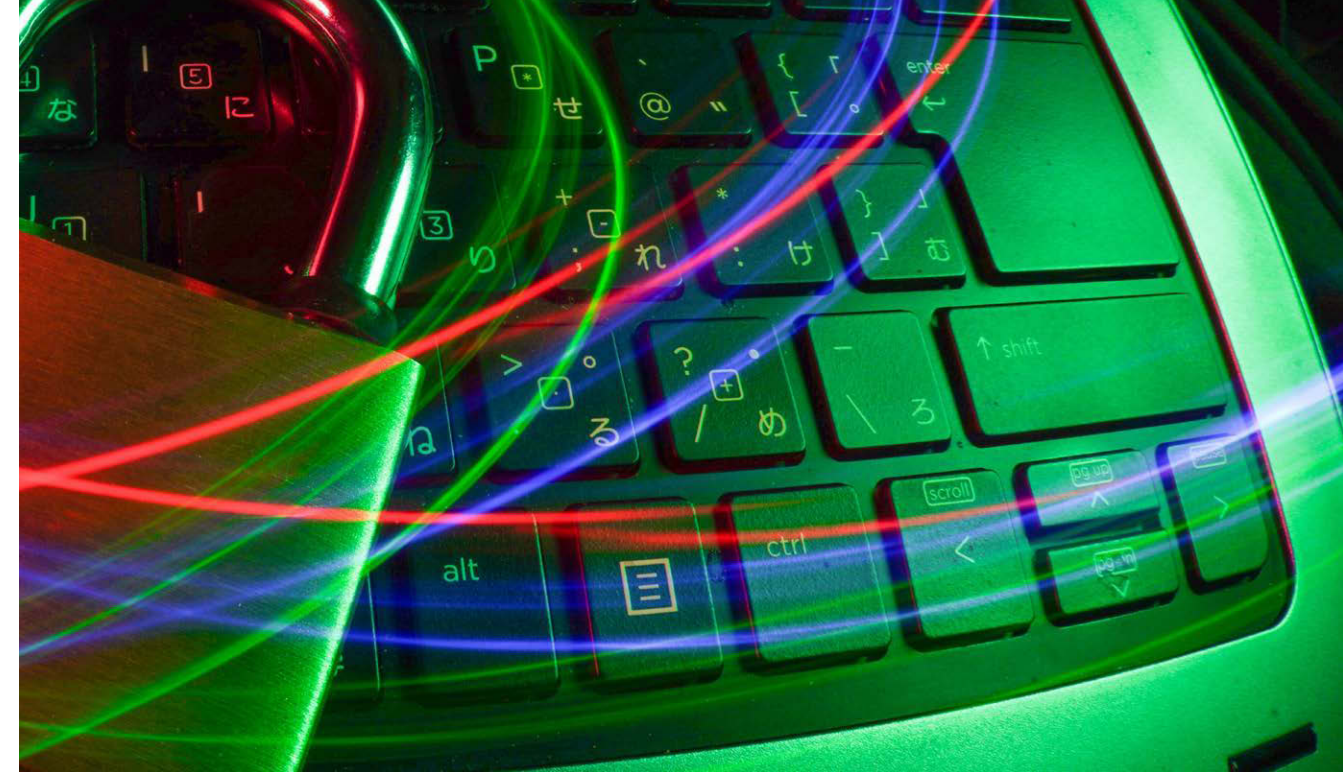

This course equips you to meet the increasing demands for combining computer networks, security, and programming expertise raised by the growing adoption of the next-generation network (NGN) services. This course includes key networking topics prepared carefully according to the new Cisco certification path, in consultation with our Cisco partner.

Computer Science BSc (Hons)

This course focuses on modern approaches to software systems development, allowing you to explore both the theoretical and practical skills needed to understand programming language concepts, software design methods, secure web systems, computer architecture and computer networks. This course is accredited by BCS, The Chartered Institute for IT, for the purposes of fully meeting the academic requirement for registration as a Chartered IT Professional.

Cyber Security BSc (Hons)

With unprecedented demand for cyber security expertise to protect our society, economy, national security and critical infrastructure, this course is designed to teach the specialist skills required to meet the industry's need for highly qualified graduates.

Games Production BSc (Hons)

Develop the practical skills needed for a career in the booming video games industry, from learning to use different game engines to gaining valuable vocational experience. You will gain industry-relevant experience in game engines, such as Unity3D, Unreal, CryEngine and Godot. You will develop your skills in sound engineering and cross-platform development, such as console, mobile, virtual and augmented reality.

Mathematics BSc (Hons)

This course develops your practical skills to solve real-life problems, enabling you to effectively communicate mathematics in the work environment. It will challenge and develop rigour in your mathematical knowledge and abilities.

Software Engineering BSc (Hons)

Combine your analytical skills with creativity and study a blend of established theories and modern design techniques to become proficient in developing high quality software. This course is accredited by BCS, The Chartered Institute for IT, for the purposes of fully meeting the academic requirement for registration as a Chartered IT Professional.

Facilities

Our laboratories host a wide range of industry-standard software packages, over 20 general computer laboratories and specialist spaces for cyber security and games production. Students can also download and use many of our software packages remotely using open source.

DMU is recognised as a leading university for research in cyber security thanks to its Cyber Technology Institute (CTI) and cyber laboratories – a hub which focuses on the development of knowledge and technologies to ensure a smart, safe and secure cyberspace.

Careers

Our computer science and informatics graduates have gone on to work as software engineers, data analysts, web developers, games programmers and cyber security engineers at Microsoft, IBM, Deloitte, Airbus and HSBC.

Our award-winning placements team will help you find a placement to suit your aspirations, with students having previously secured roles at Rolls Royce, PepsiCo and GCHQ.

Creative Design

Course	UCAS points
Animation BA (Hons)	104
Concept and Comic Arts BA (Hons)	120
Game Art BA (Hons)	112
Graphic Design BA (Hons)	104
Graphic Design (Illustration) BA (Hons)	104

Education 2030

Our courses are carefully designed and taught by expert academics to help you gain the skills needed to enter today's competitive jobs market and succeed in your career. We are innovating the way we teach with Education 2030, our new student-centred approach to learning. For most of our courses, you will study one module at a time instead of several at once, allowing you to focus on each topic in depth and form a close sense of community as you study with the same group of course mates and tutors for each block. If a programme is not currently available to UK, EU or international students, this will be notified on the specific course page on our website.

Creative Design

Our Creative Design courses are purposed to give you the skills you need to succeed in the creative industries, whether you are passionate about working in animation, game art, concept and comic arts, graphic design or graphic design (illustration).

Learn from experienced academics who are practising industry professionals, and stay at the forefront of the latest industry trends and techniques by attending practical workshops and guest lectures. Enjoy opportunities to showcase your work at national and international creative events, competitions and festivals.

Animation BA (Hons)

Prepare for a career in the thriving animation industry by developing your creative thinking, storytelling and illustrative animation skills. This course combines academic excellence and professional practice, with a focus on producing festival-ready animation, building an online presence and creating an industry-standard showreel.

Concept and Comic Arts BA (Hons)

This course encompasses two distinct practical themes – concept art and comic art, both of which focus on fundamental, traditional art skills and contemporary digital techniques.

In concept art, you will be helped to master a range of industry-focused tools and techniques for developing pre-production, production and post-production art for the film and video game industries. In comic art, you will develop a practical understanding of idea generation, visual storytelling and visual communication.

Game Art BA (Hons)

Combining creativity and knowledge of specialist technology, coupled with strong industry links, you will develop the skills required for roles as an environment artist, character artist, lead artist, technical artist or director. Our specialist Game Art degree is accredited by ScreenSkills, and is an Unreal Engine Academic Partner.

Graphic Design BA (Hons)

Explore and establish your creativity through a series of projects and workshops to build your portfolio, focusing on graphic communication, creativity and graphic literacy. You'll also be able to develop other areas such as research, analytical and entrepreneurial skills. Teaching staff are practising designers with a range of experience and close industry links, allowing you to spend time working with professional clients.

Graphic Design (Illustration) BA (Hons)

Learn how to engage audiences and develop your own personal visual style across print, digital and analogue media platforms. You will be taught how to interpret briefs, identify and solve problems to create innovative design illustration solutions. You will have the opportunity to explore and experiment with an extensive range of media and craft skills, taught by expert practitioners.

Facilities and support

We have industry-standard software and high-spec PCs and consoles for producing 3D game content, a drawing studio and a suite of Cintiq graphics tablets. Our Graphic Design students also have access to specialist digital printing facilities, green screen studios, letterpress and traditional printmaking workshops.

Careers

We will develop your own distinct style and voice and prepare you for a rewarding career in the creative industry. From securing placements at organisations such as EA Games, Next and communications and graphic design agencies, graduates have gone on to work for a range of companies such as Net-a-Porter, Warner Music, Bauer Media and Codemasters.

Design

Course	UCAS points
Design Crafts BA (Hons)	112

Grace Arnold, Interior Design BA (Hons)

Design

Our design courses nurture your creativity and encourage experimentation within a professional and energetic learning community allowing you to explore your interests and aspirations through studio projects, exhibitions, lectures and workshops. You will tackle real-world problems and propose new futures with support from expert tutors who will give you personalised feedback, empowering you to forge your own path in the creative industries.

Design Crafts BA (Hons)

Our long-standing craft provision in ceramics, glass, jewellery and metalwork will help you discover your artistic style and develop your entrepreneurial skills to prepare you for a range of careers in the creative industries. You will explore traditional hand skills and emerging technologies while working with a wide range of materials such as hot glass, fine metals, clay, resin and fibres as you are encouraged to establish your own creative voice.

Interior Design BA (Hons)

On this course, you will challenge the idea of 'space' and reimagine existing interiors to create innovative and experiential spaces centred on the user. You'll explore spatial design and small-scale architecture to design exciting new spaces for exhibition, retail, leisure, eating and socialising purposes. You'll develop skills in drawing, 3D modelling, computing, virtual reality and computer-aided design (CAD).

Product Design BA (Hons)

Study the creative design process, from the conception of an idea through to its production. You'll focus on developing products and experiences that are valued by the end user, with an emphasis on sustainability. Explore research insights, concept generation, three-dimensional design, product styling, brand definition, user interaction and manufacture.

Product Design BSc (Hons)

Bring your problem-solving ideas to life on this course that combines creative and technical skills. You will develop a technological approach to the design of innovative products, exploring product definition, technology integration, electronic and mechanical engineering and manufacture, with a focus on sustainable and socially-conscious practices.

Facilities

Our award-winning Vijay Patel Building brings all of our design courses together into a contemporary setting. This creative hub will provide you with all the tools you need to realise your true potential for any career in the creative industries.

You will benefit from using our extensive range of specialist facilities such as CAD, modelscope, video visualisation and drawing studios. Along with workshops in hot glass, wood, metal and plastics including the latest in additive manufacturing and rapid prototyping equipment.

See a stunning showcase of the building at dmu.ac.uk/aad

Careers

Gain professional experience during an optional placement year. Recent placements include BMW, Artform International, Ashfield Events, Dyson, Newman Gauge and Jaguar Land Rover. Graduates have set up their own craft workshops, worked in design studios, and become exhibition designers and user experience consultants. They are working for big brands, including Checkland Kindleysides, Jack Morton Worldwide, Sainsbury's, Argos and JCB.

Awards and showcasing

Become one of our award-winning students by entering national and international competitions, such as the prestigious RSA Student Design Awards, the D&AD Student Design Awards and the Goldsmiths' Precious Metal Awards.

You can develop your professional portfolio and gain industry exposure by showcasing your work. With our well-established links in the creative city of Leicester, students can exhibit at LCB Depot and Leicester Gallery and at prestigious events such as New Designers and One Year On.

Teaching expertise and industry links

You will be taught by academic staff and technicians who have worked in professional practice or are researching the latest developments in their sector, bringing this expert insight into your learning. There are opportunities to engage with the design community through guest lectures from renowned designers, craftspeople and respected research scholars. We work with industry to shape our courses, and you can take part in live design projects set by industry experts such as Wedgwood, Marshalls plc and Sainsbury's Home.

Economics

Course	UCAS points
Business Economics BA (Hons)	112
Economics BSc (Hons)	112

Education 2030

Our courses are carefully designed and taught by expert academics to help you gain the skills needed to enter today's competitive jobs market and succeed in your career. We are innovating the way we teach with Education 2030, our new student-centred approach to learning. For most of our courses, you will study one module at a time instead of several at once, allowing you to focus on each topic in depth and form a close sense of community as you study with the same group of course mates and tutors for each block. See pages 12-13 for more information.

Please note: Course information was correct at the time of going to print and is subject to review, so may vary. For the most up-to-date course information, a full list of modules, course duration and entry requirements visit our website. If a programme is not currently available to UK, EU or international students, this will be notified on the specific course page on our website.

Economics

By studying economics, you will gain skills in quantification, evaluation and design at an advanced level while building transferable skills in quantitative methods and statistical techniques. Our modules are designed to give you a robust understanding of how to deal with and organise data in a comprehensive way. Some of the economics modules use the Trading Room software, giving students access to the same information as leading decision-makers in finance, business and government – bringing the real world into the classroom.

You will also learn to analyse and measure real economic issues based on theory, develop an understanding of how economic policy is formulated and gain the analytical and critical evaluation skills to recognise how national and global issues affect the performance of a business.

Business Economics BA (Hons)

On this course, you will learn to analyse real issues in economics and business based on a knowledge of theory and an understanding of how economic policy is formulated. You will study a range of areas, including macroeconomics for business, data modelling and analytics, international economics, sustainability and emerging markets.

Economics BSc (Hons)

From living standards to the causes of market crashes, the impact of economics plays a critical role in all our lives. Contemporary economics emphasises data-driven analysis, and this course puts it at the heart of our approach. By studying this course, you will learn to analyse real issues in economics and business based on a knowledge of theory and an understanding of data analysis. You will study a range of areas, including applied microeconomics, data management and visualisation and digital economics and artificial intelligence.

Careers

Our award-winning careers service, DMU Works, offers exceptional career support, including professional work experience opportunities, one-to-one CV advice, interview preparation and employability mentoring – all tailored to your course. You can also benefit from guest lectures, work on live briefs and networking opportunities.

Placements

Students have the opportunity to complete a year in industry before their final year of study. These placements are full-time, salaried jobs across large, medium and small organisations in a range of sectors.

Previous students have taken up placements in HR in the private, public and not-for-profit sectors, including some international posts, with leading companies and organisations such as Airbus, Ametek, IBM, Marks and Spencer, DHL and the NHS.

Facilities

You will study in the modern Hugh Aston Building and The Yard, a new extension to the Hugh Aston Building designed to enhance your learning experience with large and airy breakout spaces, a new Student Advice Centre and a top-floor balcony.

Engineering

Course	UCAS points

Education 2030

Our courses are carefully designed and taught by expert academics to help you gain the skills needed to enter today's competitive jobs market and succeed in your career. We are innovating the way we teach with Education 2030, our new student-centred approach to learning. For most of our courses, you will study one module at a time instead of several at once, allowing you to focus on each topic in depth and form a close sense of community as you study with the same group of course mates and tutors for each block. See pages 12-13 for more information.

Please note: Course information was correct at the time of going to print and is subject to review, so may vary. For the most up-to-date course information, a full list of modules, course duration and entry requirements visit our website. If a programme is not currently available to UK, EU or international students, this will be notified on the specific course page on our website.

Engineering

Explore innovative developments in the field of engineering and build the skills and knowledge you need to become a professional engineer. Our courses have strong industry links and are taught by research-active academics to ensure you study a high-quality, contemporary curriculum that is aligned with industry demand.

The School of Engineering and Sustainable Development has great links with the Industry Liaison Committee (ILC) enabling students to get insights and opportunities from industry professionals which factors into the learning on the courses.

Engineering Year Zero

Through mastering core skills in science, mathematics, design and IT, this course can be a stepping-stone towards one of our undergraduate engineering degrees. This course is designed to be a stepping stone for students who wish to study engineering but do not meet the entry requirements.

Aeronautical Engineering BEng/MEng (Hons)

This course covers the basic principles of aeronautical engineering, including experimental and theoretical aerodynamics, aircraft design, flight dynamics and control, aircraft propulsion, flight simulation technologies, aircraft structures and computational aerodynamics.

Electrical and Electronic Engineering BEng/MEng (Hons)

Designed in close consultation with industry, this specialist degree offers a strong foundation in electrical and electronic engineering. You will study a range of core topics, including electronic circuits and systems and embedded systems, and choose from optional modules, such as mobile communication and advanced power electronics and applications.

Energy Engineering BEng/MEng (Hons)

Develop specialist knowledge about conventional and renewable energies for power generation and modern energy storage solutions. This degree is underpinned by traditional engineering principles and will equip you for diverse roles in the energy sector.

Mechanical Engineering BEng/MEng (Hons)

Develop the skills and knowledge needed to become a professional engineer by studying the design, development, installation, operation and maintenance of just about all movable parts. This course prepares you for a career in one of the most diverse and versatile engineering fields.

Mechatronics BEng/MEng (Hons)

Mechatronics covers the integration of mechanical, electronic and intelligent control sub-systems to realise a complete system, which may be a product, machine or process. Mechatronics engineers can enjoy highly versatile careers due to their multidisciplinary skills.

Facilities

Our dedicated facilities include workshops fitted with a variety of machines and computing equipment, an engine test cell, a subsonic wind tunnel, an AIRFOX DISO flight simulator, a dynamics and control laboratory and facilities for material microstructure examination.

Our dedicated high-tech Smart Grid facility includes modules that simulate generation sources (thermal, hydroelectric and wind farm), transmission and distribution components of the electrical grid and microgrid units including small PV solar for domestic use.

Careers

We support you to succeed in your goals, offering work placements to boost your skills and experience.

Our students have secured placements or careers in companies including BMW, Caterpillar, the National Grid, Airbus UK, JCB, Toyota and Vodafone.

Fashion and Textiles

The award-winning School of Fashion and Textiles offers a unique range of courses, with a global reputation for specialisms in contour fashion and footwear design.

Taught by highly experienced staff in dedicated facilities, our courses are future-facing and informed by contemporary culture, industry practice, digital innovation and sustainability. We are recognised as one of the country's most sustainable fashion and textiles schools (Green Gown Awards, 2021).

Expertly combining theory and practice, our curriculum is designed to build your knowledge and skills in a unique step-by-step approach. You will be challenged to think critically, solve problems and consider dynamic ways to make our industry more ethical and sustainable. We are proud to celebrate culturally diverse contexts, and we will encourage you to bring your own identity, values and perspective into your learning. You will develop global awareness and a range of employability skills that will prepare you for careers across the industry.

Contour Fashion BA (Hons)

The world's original and leading degree dedicated to the design of intimate apparel. Established in 1947 by the British corset industry, Contour Fashion combines heritage, innovation and technical excellence. Specialise in lingerie, athleisure, swimwear, loungewear, nightwear, corsetry, womenswear and menswear.

Fashion Buying with Design BA (Hons)

Developing in-depth design and buying expertise, you will gain knowledge of the product lifecycle and critical path, current trends, selection, costing and promotion. Created to help you meet the needs of the dynamic and fast-moving fashion sector, this course covers womenswear, childrenswear and menswear.

Fashion Buying with Marketing BA (Hons)

This versatile and dynamic course, with its emphasis on buying, business and marketing, will prepare you for a range of careers in the fashion industry. You'll focus on the business side of fashion, building your knowledge of planning, branding, public relations/communications and social media platforms.

Fashion Buying with Merchandising BA (Hons)

The fashion industry is evolving with the shift in fashion retailing from high street to commerce. You'll develop in-depth knowledge of the buying cycle and the critical path, and key activities around trading the range, its selection process and strategic stock management; reacting to sales and managing sales promotions.

Fashion Communication and Styling BA (Hons)

Highly creative and practical, this degree will teach you how to think like a fashion stylist and communicator, manipulating visual stories, employing new technologies and exploiting promotional platforms within the fast-moving world of fashion. You'll learn how to engage with audiences and tell 'style stories' to transform fashion pieces into modern must-have trends.

Fashion Design BA (Hons)

Immerse yourself in the creative, dynamic and ever-evolving world of fashion and develop skills to turn your ideas and designs into original and innovative garments. You can specialise in menswear, womenswear and or fashion knitwear. You will be introduced to the academic, professional, industrial and commercial challenges of design practice.

Fashion Management (Level 6 Top Up) BA (Hons)

This one-year programme will prepare you to study contemporary issues in a range of fashion management related subjects, where you will learn the key skills needed to pursue a career in this dynamic industry.

Fashion Textile Design BA (Hons)

Become a versatile fashion material specialist across print, stitch, embellishment and knit. You will develop research, conceptual, creative and technical skills, alongside practical skills such as pattern cutting, construction, fashion illustration and digital portfolio promotion. We will help you to become a forward-thinking contemporary designer with an understanding of responsible and sustainable design.

Footwear Design BA (Hons)

This is one of the few degree programmes in the UK dedicated to the design and development of footwear. With a rich heritage and extensive industry links, this course will equip you with the skills to become a specialist designer with a unique understanding of the art of shoe-making that's highly sought-after in this well-connected sector. Choose to specialise in performance footwear, men's, women's, or children's footwear.

Textile Design BA (Hons)

This degree will help you to discover your distinctive design identity and create dynamic collections across a range of fashion, interior or lifestyle markets. You can specialise in one of four areas - mixed media, print, knit or weave - while working with industry experts who will support you in creating ambitious textile design solutions.

Facilities

Our award-winning Vijay Patel Building brings all of our fashion and textiles courses together into one beautifully contemporary setting to create a dynamic and thriving community. You will have access to an extensive range of specialist facilities including professionally equipped studios, print rooms, dye lab, textile testing, digital fashion facilities as well as shoemaking, weaving, sewing and knitting workshops. With this one building as your base, you will become part of a hub for creative thinking and collaboration.

See a stunning showcase of the building at dmu.ac.uk/aad

Careers and placements

Enhance your career prospects with a placement or enterprise year in the UK or overseas. Previous students have gained placements at global brands, including Disney, Jenny Packham, Joules, Next, Ralph Lauren and Tommy Hilfiger.

Our graduates go on to work for big names such as Alexander McQueen, French Connection, Gymshark, Lounge Underwear and lululemon, and many have started their own brands, including Biondi London, Elissa Poppy and Mariah Esa.

Awards and showcasing

Develop your profile by taking part in prestigious competitions in which DMU has a proud history of success. Previous students have won prizes, bursaries and placements at the Bradford Textiles Society Awards, New Designers and Graduate Fashion Foundation Awards.

There are opportunities to showcase your work at major international events, such as Graduate Fashion Week, New Designers and MODA. Our students also took part in the GREAT Festival of Innovation in Hong Kong and Expo 2020 in Dubai.

Teaching expertise and industry links

The teaching team are experts in the creative industries and bring their professional experience into your learning. We have a well-established reputation and extensive networks that include industry associations, trade bodies and livery companies. These links provide opportunities from live briefs with global brands such as Ted Baker, Gymshark, ASOS, Habitat, Mint Velvet and New Balance to projects exploring social justice with leading charities such as Shelter and Sue Ryder.

Health Sciences and Allied Health Professions

Allied Health professionals play a vital part in treating, rehabilitating and improving the lives of patients. With many of our courses accredited or endorsed by professional bodies, you can be assured of receiving teaching of the highest quality with a focus on building the skills sought after by graduate employers.

Biomedical Science BSc (Hons)

This course gives you a detailed understanding of science in health, covering the application and knowledge of techniques used to diagnose complex diseases such as diabetes and heart disease in clinical laboratories.

Diagnostic Radiography BSc (Hons)

This course equips you to become a qualified diagnostic radiographer with the skills to produce high-quality images to aid the diagnosis and treatment of injury and disease.

Health and Wellbeing in Society BSc (Hons)

Studying this course enables you to understand and analyse contemporary developments across the UK health scene. Our graduates are working in the NHS and the private healthcare sector in areas such as health promotion and education, community development and research.

Healthcare Science (Audiology) BSc (Hons)

Accredited by the National School of Healthcare Science, this course teaches you to assess and rehabilitate people with hearing and balance conditions.

Medical Science BMedSci (Hons)

This course integrates scientific research and clinical skills to develop your understanding of the human body in relation to health and disease. You will acquire a thorough knowledge of clinical and evidence-based skills, specialising in immunology, physiology, pathology and endocrinology.

Paramedicine BSc (Hons)

This course covers all elements of paramedic science, and integrated placements give you the opportunity to work alongside senior paramedics in emergency ambulances and in settings such as A&E departments and doctors' surgeries.

Speech and Language Therapy BSc (Hons)

This course is designed to equip you with the expertise to assess and treat speech, language, communication and swallowing problems in people of all ages.

Facilities

You will learn in a range of facilities such as analytical chemistry and microbiology laboratories, a specialist radiography suite, a balance booth and dedicated speech and language computer labs. Our simulation suite – a purpose-built clinical skills facility featuring multi-function teaching rooms, cubicles for small scale demonstrations, a practice counselling room and a paediatric audiology assessment room – gives students hands-on experience in a safe practice environment.

Careers

You will have access to award-winning, flexible career support tailored to your needs, including help with securing placements. Students have completed placements across the NHS, with the East Midlands Ambulance Service NHS Trust (EMAS), in pharmaceutical companies, with national charities and government bodies. Our graduates have gone on to careers with organisations including 3M, the Ministry of Defence and the NHS.

Accreditations

Our courses boast professional accreditations from respected organisations such as The Institute of Biomedical Science, The National School of Healthcare Science and The Royal Society of Biology. The majority of our Allied Health Professional courses are officially approved by the Health and Care Professions Council (HCPC), the governing body with which qualified health workers register. Upon successful completion of their studies, students are eligible to register with the HCPC and work within their chosen profession.

Humanities

Studying humanities is an intellectual and imaginative adventure that will nurture your engagement with the world around you. You will join a supportive community of experts to share practices and passions that will challenge and change you. As a diverse and inclusive community, we value your unique perspective and will work with you to develop your ideas. Employability, critical thinking and creativity are embedded in our curriculum, preparing you for a range of careers.

Many of our courses give the opportunity for you to study a second subject as a route alongside your main subject such as Creative Writing, English Literature, English Language, Drama, Education, Film, History, Journalism or Media. These carefully chosen routes will complement and enrich your understanding of your main subject and will broaden your skillset to give you a wider range of career paths upon graduation.

Creative Writing BA (Hons)

Our innovative course will challenge you to write using new forms and ideas in a wide range of genres, while being pushed to experiment with new creative outlets to find your own voice. Explore stimulating themes to develop skills across fiction, poetry, memoir, the graphic novel, screenwriting, audio and performance writing and new media.

English Language BA (Hons)

On this course, you will immerse yourself in the form, culture and analysis of a global language rich in history. Discover how the language we speak shapes who we are and the world we see. You will explore how languages operate on web-based platforms, alongside developing your expertise in communicating effectively at all levels and in a range of formats.

English Language with TESOL BA (Hons)

On this course, you will develop your own ability to teach English to non-native speakers whilst thinking about how language functions in the world today. You will study linguistics, grammar, the evolution of the English language and a variety of writing styles, while gaining the skills to impart your language expertise to others.

English Literature BA (Hons)

Study an exciting range of literature from writers across the globe and on subjects including the novel, Victorian and Romantic literature and Shakespeare and Marlowe. Learn how texts work and debate literature's role in society both now and throughout history. You'll join a lively community that is friendly, supportive and passionate about literature.

History BA (Hons)

Exploring primarily modern and contemporary history, our course is diverse, international in focus and innovative. You will learn about British, South Asian, European, African and North and South American history and also discover unique specialist topics such as history of photography and history of sport and leisure. This course will hone your ability to absorb, understand and communicate complex information.

History, Politics and International Relations BA (Hons)

Explore, debate and evaluate some of the key events and ideas that have shaped our world throughout contemporary global history and in the ever-changing international political landscape. Reflecting the globalised world we live in, the history curriculum covers a wide range of modern and contemporary European and non-European histories. You will also gain an understanding of the role politics plays at local, national and global levels and explore crucial issues in contemporary international politics.

With Languages

You can study English Language, English Literature or History with French, Mandarin or Spanish, from either beginner or post-GSCE level. You will study your chosen language at a pace that suits you and gain skills that are highly sought-after by employers.

Careers and placements

Humanities courses teach you how to think critically and creatively and evaluate complex information – transferable skills that will enable you to excel in all fields in life. Our graduates have gone on to successful careers in areas including publishing, journalism, teaching, museums, libraries, law, management and digital marketing.

You can gain valuable professional experience by undertaking a placement year in the UK or overseas, with previous students teaching English abroad and working with leading publisher Penguin Random House.

Events and opportunities

You'll join an active and welcoming learning community with guest speakers from across the creative industries and events that help you explore different career paths. You can participate in the student-led Cultural Exchanges festival, featuring discussions and performances from well-known figures in the arts, and the States of Independence publishers' fair.

Teaching expertise and industry links

Our courses are taught by active researchers and practitioners who will inspire and challenge you to gain the most from your studies. Their expertise has seen them land book deals, work as scriptwriters, appear on national television and make breaking news.

Our specialist on the modern history of the Western Balkans, Professor Kenneth Morrison, has worked on a series of documentaries for world media network Al Jazeera. Extensive research on Victorian etiquette earned Dr Toni Weller a spot-on Channel 4's Britain's Most Historic Towns, while one of our leading Shakespeare studies experts, Professor Gabriel Egan, made headlines around the world when he proved that the Bard had a co-writer on some of his plays.

Law

Course	UCAS points
Law LLB (Hons)	120

Education 2030

Our courses are carefully designed and taught by expert academics to help you gain the skills needed to enter today's competitive jobs market and succeed in your career. We are innovating the way we teach with Education 2030, our new student-centred approach to learning. For most of our courses, you will study one module at a time instead of several at once, allowing you to focus on each topic in depth and form a close sense of community as you study with the same group of course mates and tutors for each block. See pages 12-13 for more information.

Please note: Course information was correct at the time of going to print and is subject to review, so may vary. For the most up-to-date course information, a full list of modules, course duration and entry requirements visit our website. If a programme is not currently available to UK, EU or international students, this will be notified on the specific course page on our website.

Law

Our Law course is designed to kick-start your legal career by combining academic expertise with projects that put your legal training into practice. A law degree is also an excellent foundation for a wide range of careers if you choose not to progress to become a solicitor or a barrister. You will develop sought-after transferable skills such as negotiation, conflict resolution and critical thinking, as well as an understanding of the law. The opportunities offered at DMU will allow you to pursue a variety of exciting career paths. Our graduates have secured roles with renowned law firms, government departments and big names in the industry.

Law LLB (Hons)

In the first year, everyone will study core modules in Constitutional and Administrative law, Contract Law, Criminal Law, and English and European Legal Contexts. The focus on foundational legal knowledge and skills will continue in the second and third years with Land Law, Law of Tort, and Equity and Trusts. After your first year, you will have the opportunity to focus your studies by selecting a preferred specialism pathway in one of the following areas: Business Law, Criminal Justice, Human Rights and Social Justice, Sociolegal Studies, and International Law. Alternatively, you can continue on the Law LLB pathway.

Facilities

Leicester De Montfort Law School students have access to a crown court – a site of trials since the Middle Ages – a civil court, and a contemporary mock courtroom. Within the university's Hugh Aston Building, there is a dedicated law library, exclusively for use by law students, and a client interviewing room, which allows you to practise scenario-based learning.

Real-world learning

All of our students have the opportunity to engage in a real trial experience before a sitting judge, supported by expert advocacy trainers. You can also enhance your CV through projects and activities such as Street Law and the DMU Legal Advice Centre, which gives you opportunities to hone your skills by providing free legal advice to members of the public.

Careers and placements

Our course is designed to develop your professional skills and enhance your job prospects. You will benefit from our Careers Project, consisting of CV clinics, mock interviews, opportunities to meet local legal practitioners and seminars on all aspects of legal career paths. In addition, you will engage in mooting and client interviewing as part of skills development throughout your programme. You'll also have the opportunity to undertake a year-long, salaried industry placement in the legal sector through our award-winning DMU Works careers service.

Marketing

Course	UCAS points
Advertising and Marketing Communications BA (Hons)	112
Business and Marketing BA (Hons)	112
Marketing BA (Hons)	112

Education 2030

Our courses are carefully designed and taught by expert academics to help you gain the skills needed to enter today's competitive jobs market and succeed in your career. Marketing

DMU is a Chartered Institute of Marketing (CIM) Accredited Study Centre and an Institute of Data and Marketing (IDM) Key Educational Partner. This means we can draw on business and research experience and industry links to deliver courses that reflect the latest developments in marketing theory and practice, including digital marketing and social media technologies. There are opportunities to gain significant exemptions from IDM and CIM professional qualifications, depending on your module choices.

Advertising and Marketing Communications BA (Hons)

This accredited course combines the strategic side of marketing with the application of cutting-edge theory and techniques in creative areas such as social media, influencer marketing and campaign planning. This course will provide a solid theoretical underpinning of marketing as a discipline and how organisations use it. It will build upon contemporary techniques to provide knowledge and skills that are directly relevant and applicable to employers and industry best practice.

You will work on live industry campaigns on which you can apply your learnings and demonstrate your creativity for companies and brands such as Pall-Ex, Aston Martin, Samsung and Next, as well as benefit from opportunities to participate in creative pitch competitions such as X-Culture and the CIM The Pitch.

Business and Marketing BA (Hons)

Effective marketing strategy and up-to-date business knowledge are key to any modern company's success. By studying both marketing and business subjects, you will be able to apply a wide range of specialist areas from business consultancy to more marketing-focused areas such as brand management, marketing research, digital marketing and sales.

Marketing BA (Hons)

This course is accredited and recognised by the CIM graduate gateway programme. It will provide you with an in-depth understanding of all areas of contemporary marketing and how that fits into the wider business function and society. You'll learn how to select and apply appropriate methods and techniques to develop marketing solutions to challenges faced by some of the biggest companies in the world. You will study emerging trends and gain real-world experience through our partnerships with award-winning digital marketing agencies, allowing you to develop the necessary skills and attributes to succeed in a professional marketing position.

Careers

Our award-winning careers service, DMU Works, offers exceptional career support, including professional work experience opportunities, one-to-one CV advice, interview preparation and employability mentoring – all tailored to your course. Our students have taken placements with companies including Samsung, PWC, Next, Honda, Bosch and Rolls Royce. You can also benefit from guest lectures, work on live briefs and networking opportunities.

Facilities

You will study in one of our two main buildings, the modern Hugh Aston Building and the recently renovated Leicester Castle. Our facilities include IT labs, study suites and a learning zone, as well as The Yard, a new extension to the Hugh Aston Building designed to enhance your learning experience with large and airy breakout spaces, a new Student Advice Centre and a top-floor balcony.

Accreditations

All of our marketing courses are approved for exemptions on The Chartered Institute of Marketing (CIM) qualifications. This means that you will graduate with a degree that is recognised by one of the world's leading professional marketing bodies respected industry-wide.

Media

Our media courses are designed to give you the skills you need to succeed in the media industry, whether you are passionate about exploring critical perspectives in media, television and film or want to build a technical and practical skillset to prepare for a role in journalism, digital broadcasting or social media production.

Learn from academic experts who are active in industry, and enhance your studies by attending guest lectures from film directors, writers and journalists. Enjoy opportunities to benefit from close links with local media partners and community media organisations.

Film Studies BA (Hons)

Develop your skills as a professional film-maker, critic, event organiser, writer or industry analyst through the academic study of cinema. In an increasingly media-focused world, this course will help you acquire a skillset required for many technical and creative roles.

Journalism BA (Hons)

This course is designed to be flexible and allow you to focus on specialist areas of your choice, which include music journalism, lifestyle and sports while also preparing you to challenge the status quo. You will be encouraged to focus on core issues of social equality, social justice, protest and marginalised communities in the UK.

Media and Communication BA (Hons)

This course provides you with the practical research skills and critical perspectives in media, television and cultural studies to set you up for a career in the industry. The teaching of this course has a modern focus which enables students to adapt to changes and developments in industry and proficiently use the most up-to-date technology.

Media and Communication with Modern Languages BA (Hons)

Set yourself up for a career in media with key practical research skills and critical perspectives combined with the study of a language (French or Mandarin). You will be taught by experts in media, television and cultural studies as well as experienced practitioners in the field of public relations and new media.

Media Production BSc (Hons)

Master the technical foundations and practical skills needed for a role in digital broadcasting or social media production across a range of video, image-making, photography, audio and web formats. Join student societies such as Demon Media group and contribute to its magazine, radio station, TV station and website.

Visual Effects (VFX) BSc (Hons)

This course provides you with the skills needed to gain a leading role in visual effects for video and film. It encourages you to develop your creative flair and understanding of industry-standard software to create your own 3D content for use in film and television projects.

Facilities

Students on production and creative media courses can sharpen their skills in our multimillion-pound facilities that feature editing suites, high-tech radio and TV studios, and video production laboratories. Students on our theoretical courses can benefit from partnerships with local cinema and art centres.

Careers

Our media courses will develop your existing passion and prepare you for a role in the industry. Students have completed placements in companies such as Jaguar Land Rover, Bosch, The Times and Leicester City Football Club.

Graduates have gone on to work in a wide range of careers from producers, editors, and writers to journalists, researchers and television production staff at the BBC, the Guardian, the Telegraph, Sky Sports, Film4 and Odeon Entertainment.

Music

Our music courses are designed to give you the skills you need to succeed in the thriving music industry, whether you are passionate about using new technology to explore music-making, or want to build a technical and creative skillset in music and audio production.

Learn from experienced musicians who are active performers, composers and researchers, and enhance your studies by attending guest lectures from music industry professionals. Enjoy opportunities to showcase your work at some of Leicester's most exciting cultural institutions, including Curve, Phoenix Cinema and Art Centre and LCB Depot.

Music Production BSc (Hons)

This course is industry-focused and ideal for those with a passion for music and audio production and who want to develop a highly attractive portfolio of technical and creative skills that will help you pursue a successful career in all industries that require audio expertise.

It covers the science and technology of audio and recording systems and how these can be used effectively in recording, mixing and mastering and sound design. You will learn the principles of electronics and acoustics, develop skills in audio mixing and mastering, study the measurement and design of recording and audio product environments, and produce sound for radio, television, film, video games and online content.

Music Technology BA (Hons)

Combine studio and performance skills with the possibilities offered by new technology to create original music and explore innovative forms of music-making. You will explore an extensive range of approaches to creating and performing, such as multi-track recording, production and composition, new technologies for musical performance, music and sound for moving image, sound synthesis theory and practice, site-specific and installation work, computer coding for the creative artist and advanced surround sound.

Facilities

Our multimillion-pound Creative Technology Studios feature a range of high-specification equipment. From a suite of multi-channel composition studios to industry-standard software for recording and manipulating sound, our students have access to purpose-built facilities to allow students to develop their skills, ready to use in industry.

Careers

Our students will learn a range of skills in areas such as on-location, live, AV and studio production, allowing you to pursue a career in music production, audio engineering, sound design, remixing and mastering, radio, TV or games.

Previous music students have gained an insight into the professional world and taken up placements with major companies such as Dolby Europe Limited and Horus Music Limited.

Nursing and Midwifery

Course	UCAS points
Midwifery BSc (Hons)	120
Nursing (Adult) with NMC Registration BSc (Hons)	112
Nursing (Child) with NMC Registration BSc (Hons)	120
Nursing (Learning Disability) with NMC Registration BSc (Hons)	112
Nursing (Mental Health) with NMC Registration BSc (Hons)	112

Education 2030

Our courses are carefully designed and taught by expert academics to help you gain the skills needed to enter today's competitive jobs market and succeed in your career. We are innovating the way we teach with Education 2030, our new student-centred approach to learning. For most of our courses, you will study one module at a time instead of several at once, allowing you to focus on each topic in depth and form a close sense of community as you study with the same group of course mates and tutors for each block. See pages 12-13 for more information.

Please note: Course information was correct at the time of going to print and is subject to review, so may vary. For the most up-to-date course information, a full list of modules, course duration and entry requirements visit our website. If a programme is not currently available to UK, EU or international students, this will be notified on the specific course page on our website.

Nursing and Midwifery

Professionally accredited by the Nursing and Midwifery Council (NMC), and developed in conjunction with the NHS, our courses equip future generations of health professionals to meet the high-quality standards required to work in the nursing and midwifery professions. You will be taught by expert healthcare professionals, benefiting from the experience they have developed in practice, as well as from the knowledge gained through our partnerships with healthcare providers, research centres and leading charities since the school was established more than 50 years ago.

Midwifery Pre-Registration BSc (Hons)

Our fulfilling midwifery degree creates skilled and safe midwives through theoretical teaching and practical placements in a variety of clinical and community settings. During the course, you will work with women and their families from diverse backgrounds and ensure their care centres around their individual needs and preferences. In the final year, our case-holding module allows students to lead on providing care for families during the antenatal, labour and postnatal periods.

Nursing with NMC Registration BSc (Hons) - (Adult, Child, Learning Disability and Mental Health)

Our four nursing courses specialise in adult, child, learning disability or mental health nursing and are taught to the latest Future Nurses Standards of Proficiency introduced by the NMC in 2018. Students are taught nursing theory alongside clinical skills in practical teaching sessions, helping to build professional competencies and confidence that you will utilise in a range of placements embedded throughout the three years of the course.

Facilities

Students are taught through a comprehensive programme of simulated experiences and clinical skills sessions in practical teaching spaces, including a midwifery suite complete with a birthing pool, a moving and handling area and mock hospital wards. This allows you to learn in immersive sessions that mimic the scenarios you will encounter throughout your placements and career.

Our new simulation suite features multi-function teaching spaces, cubicles for small scale demonstrations and a practice counselling room. We've installed the latest simulation-based training solution – LearningSpace – throughout our new clinical skills suites, which gives students a 360-degree view of their training environment. This new technology means students can view teaching sessions anytime, watch recorded sessions back and review their performance.

Placements

Placements make up a large portion of your learning for nursing and midwifery courses and allow you to put the theory you have learnt into practice with the support of dedicated placement mentors and supervisors. We have excellent links with NHS trusts in Leicester, Leicestershire and neighbouring counties. We are able to offer you a range of placement opportunities in hospital and community settings, charity organisations and within the private healthcare sector.

Careers

Upon successful completion of your course, you will be eligible to apply for jobs in the UK health sector as well as internationally (subject to country-specific criteria).

Performance and Arts Management

Course	UCAS points
Arts and Festivals Management BA (Hons)	112
Dance BA (Hons)	112
Drama and Theatre Arts BA (Hons)	112
Global Arts Management (Level 6 Top-Up) BA (Hons)	–
Performing Arts BA (Hons)	112

Education 2030

Our courses are carefully designed and taught by expert academics to help you gain the skills needed to enter today's competitive jobs market and succeed in your career. We are innovating the way we teach with Education 2030, our new student-centred approach to learning. For most of our courses, you will study one module at a time instead of several at once, allowing you to focus on each topic in depth and form a close sense of community as you study with the same group of course mates and tutors for each block. If a programme is not currently available to UK, EU or international students, this will be notified on the specific course page on our website.

Performance and Arts Management

You will join a passionate community that celebrates the art of dance, theatre and performance and its role in our society. Recognised nationally as a Performing Arts Centre for Excellence (PACE), we will inspire and challenge you to develop an outstanding performance technique and discover the power of performance to drive social change.

You will learn to harness the value in the creative arts industries and gain the tools to apply yourself within the sector and beyond. Our regular student performances and high-profile events make studying with us a rewarding experience. Performance at DMU is embedded within Leicester's cultural life, creating exciting partnerships and opportunities with organisations such as Curve theatre, Phoenix Square and the nationally renowned Leicester Comedy Festival. We're proud that one of the most celebrated dance artists of the 21st century and DMU alumnus, Akram Khan MBE, is Chancellor of the university.

Arts and Festivals Management BA (Hons)

This is the longest-running degree course of its kind in the UK and boasts enviable industry links. The visionary curriculum is designed to prepare you for careers in the dynamic and ever-expanding cultural industries. You will develop interdisciplinary skills such as teamwork, marketing and management theory, fundraising, business planning, licensing, health and safety, programming and cultural policy.

Dance BA (Hons)

Develop your technical and performance skills in a range of contemporary practices that will broaden your understanding of dance and help you find your creative voice. With its strong industry links, this course will prepare you for a range of dance-related careers and you will be taught by staff who have international reputations for the exceptional quality of their work.

Drama and Theatre Arts BA (Hons)

Informed by a mix of contemporary methods of performance making, current scholarly thinking and historical theatrical traditions, this course prepares you for careers in a range of arts-related areas. You will engage both creatively and critically with topics including acting, performing, directing and theatre for social change, while being supported to develop your own artistic vision and aspirations.

Global Arts Management (Level 6 Top-Up) BA (Hons)

This one-year programme will develop your understanding of academic debates and business management skills as applied to the arts from an international perspective. The course structure allows you to specialise as you progress in your studies.

Performing Arts BA (Hons)

Highly practical, this distinctive course immerses you in cutting-edge, interdisciplinary practice such as acting, dance, voice, physical theatre, music theatre, sound design and digital video. It investigates the possibilities of live and digital arts in a range of performance contexts. You can personalise your studies across three themes – contemporary performance, digital performance or applied arts and education.

Facilities

DMU offers some of the finest facilities in the sector. The Performing Arts Centre for Excellence (PACE) and the Campus Centre building include spacious studios and rehearsal rooms, as well as large, fully equipped performance spaces, all with live streaming capability. Your creative work is supported by expert technicians and you can access rehearsal spaces and equipment – such as digital video cameras, sound recording equipment and editing suites – outside of your taught time.

See a stunning showcase of the facilities at dmu.ac.uk/perform

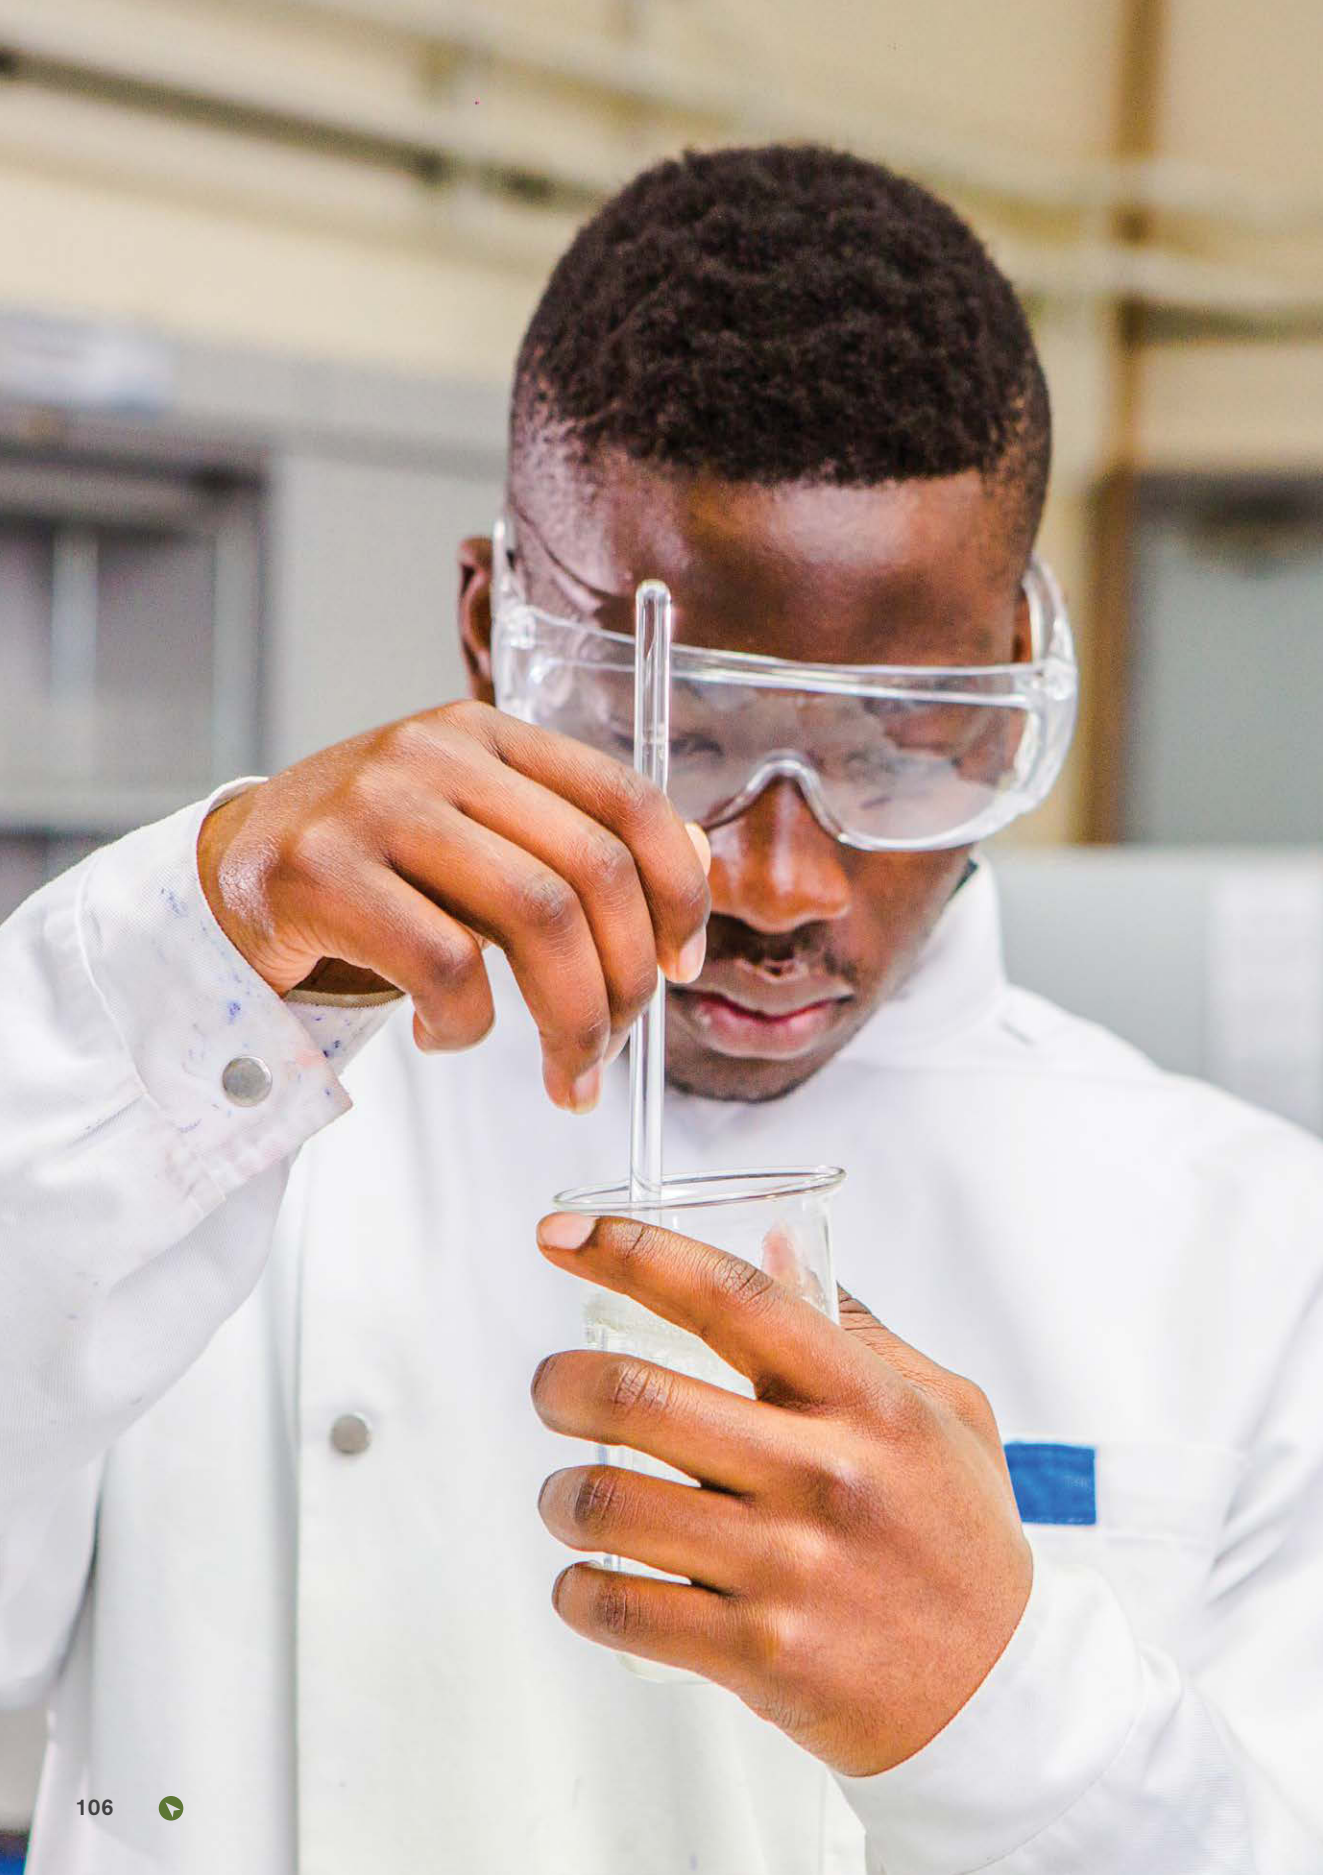

Careers and placements

You will benefit from our excellent links with artists and organisations, where you can undertake valuable placements to gain industry experience. For example, our long-standing partnership with Leicester's Curve theatre creates opportunities for internships and performing in a production.

Our curriculum responds to industry needs and will give you the skills to create, facilitate and manage, preparing you for a variety of careers. Many of our graduates enjoy success as professional artists, performers, dancers and choreographers. Others use their transferable skills to forge careers in advertising, marketing, events management and teaching.

Events and showcasing

Arts and Festivals Management students deliver Cultural Exchanges, a week of interactive talks, performances and exhibitions featuring well-known and emerging figures from the arts. The University Dance Festival shines a light on student work, bringing exuberant performances to live and online audiences. Drama students demonstrate their work during Exit Souls, a programme of enthralling performances which include durational works, live art practices and creative writing. Performing Arts students present work in collaboration with industry professionals, including internationally acclaimed physical theatre company Gecko and award-winning dance-theatre company Lost Dog.

Pharmaceutical, Cosmetic and Forensic Sciences

Course	UCAS points
Forensic Science BSc (Hons)	112
Pharmaceutical and Cosmetic Science BSc (Hons)	96
Pharmacy MPharm (Hons)	120
Pharmacy MPharm Year Zero	88

Education 2030

Our courses are carefully designed and taught by expert academics to help you gain the skills needed to enter today's competitive jobs market and succeed in your career. We are innovating the way we teach with Education 2030, our new student-centred approach to learning. For most of our courses, you will study one module at a time instead of several at once, allowing you to focus on each topic in depth and form a close sense of community as you study with the same group of course mates and tutors for each block. See pages 12-13 for more information.

Pharmaceutical, Cosmetic and Forensic Sciences

The Leicester School of Pharmacy is a long-established pharmacy school, with more than 100 years of teaching experience; renowned for academic expertise, professional development training and world-leading research.

Our teaching reflects the latest understanding from across the sector, and our professional accreditations mean our students are learning on a quality course that equips them for their future careers in industry.

Forensic Science BSc (Hons)

This course focuses on the methods used to gather, examine and analyse evidence and considers how to present it in court. You will develop an understanding of criminal law, crime scene processing, evidence analysis and forensic IT.

Pharmaceutical and Cosmetic Science BSc (Hons)

Studying this course gives you specialised and advanced knowledge of the principles behind the formulation of pharmaceutical and cosmetic products, as well as the techniques used in their design, manufacture, quality assurance, regulation and marketing.

Pharmacy MPharm (Hons)

You will benefit from integrated work placements across all four years of this course and will be equipped with the practical and professional skills needed to work as a pharmacist. Our graduates work in community pharmacy, primary care settings, locally commissioned services and the pharmaceutical industry.

Pharmacy Year Zero

This course is designed for students who do not meet the entry requirements to study our Pharmacy MPharm directly. The course covers core skills in chemistry, biology, mathematics and IT.

Facilities

You will put theory into practice using industry standard equipment in dedicated practical teaching spaces, which will help you to develop your analytical science experience beyond the classroom. These include specialist facilities such as a mock crime scene house, a pharmaceutical and cosmetics compounding and formulation laboratory, a pharmacy practice suite complete with a mock dispensary and a range of clinical skills teaching rooms complete with the latest simulation based technology – LearningSpace, which allows students to have a 360-degree view of their training environment.

Careers

Having developed sought-after knowledge and skills in our laboratories and clinical simulation suites, you can put theory into practice during either mandatory or optional work placements. Previous students have secured placements with large organisations, including Pfizer, L'Oréal and the National Crime Agency, and worked with cosmetic companies such as Lush. Our graduates have gone on to work for the NHS, law enforcement agencies and major pharmaceutical companies such as AstraZeneca, Boots, GlaxoSmithKline and LGC Forensics.

Accreditations

We boast professional accreditations with leading bodies such as The General Pharmaceutical Council and The Chartered Society of Forensic Sciences.

Politics and International Relations

Course	UCAS points
Politics and International Relations BA (Hons)	112

Education 2030

Our courses are carefully designed and taught by expert academics to help you gain the skills needed to enter today's competitive jobs market and succeed in your career. We are innovating the way we teach with Education 2030, our new student-centred approach to learning. For most of our courses, you will study one module at a time instead of several at once, allowing you to focus on each topic in depth and form a close sense of community as you study with the same group of course mates and tutors for each block. See pages 12-13 for more information.

Please note: Course information was correct at the time of going to print and is subject to review, so may vary. For the most up-to-date course information, a full list of modules, course duration and entry requirements visit our website. If a programme is not currently available to UK, EU or international students, this will be notified on the specific course page on our website.

Politics and International Relations

You will gain insight, knowledge and understanding of the role politics and international relations play locally, nationally and internationally. With our renowned experts, you'll gain both the practical and theoretical knowledge you'll need to understand and influence our world.

You will also have opportunities to engage with prominent political figures through events such as Congress to Campus and develop practical skills in research, analysis, negotiation, and communication - all vital to a range of career paths.

We offer a range of innovative forms of assessment. As well as essays and exams, students will take part in simulation games, roundtable discussions and portfolio development. In addition, you will have the opportunity to enjoy an international experience linked directly to your studies through our DMU Global programme.

Politics and International Relations BA (Hons)

Studying Politics and International Relations at DMU offers students a dynamic experience, ranging from understanding theoretical ideas that underpin the way the world works to experiences beyond the classroom and engaging with real-world projects. This vibrant course will develop your understanding of political events and processes and the skills to use your knowledge in real-world settings.

You will have the opportunity to engage with real political actors, including local councils, MPs and community organisations, on current issues. After a common core of modules that challenge you to think about politics from the local to the global, you will have the opportunity to follow one of two pathways specialising in Politics or International Relations.

Careers

Our award-winning careers service, DMU Works, offers exceptional career support, including professional work experience opportunities, one-to-one CV advice, interview preparation and employability mentoring – all tailored to your course. You can also benefit from guest lectures, work on live briefs and networking opportunities.

Students have the opportunity to complete a year in industry before their final year of study. These placements are full-time, salaried jobs across large, medium and small organisations in a range of sectors. Our students have taken placements with companies including the House of Commons, Welsh Assembly, GlaxoSmithKline and Rolls Royce.

Facilities

You will study in the modern Hugh Aston Building, with access to the recently renovated Leicester Castle. Our facilities include IT labs, study suites and a learning zone, as well as The Yard, a new extension to the Hugh Aston Building designed to enhance your learning experience with large and airy breakout spaces, a new Student Advice Centre and a top-floor balcony.

Psychological and Social Sciences

Professional accreditations and strong links with graduate employers ensure our innovative courses are of the highest quality. As well as studying contemporary topics relevant to human behaviour and society, you will develop a range of transferable skills to help you succeed in your career.

Criminology BA (Hons)

This fascinating course prepares you for a career in the criminal justice sector and allied fields by giving you an understanding of the causes, legal framework and responses to crime. Graduates go on to work in a wide range of fields, including crime prevention, the prison and probation service, victim support and youth justice.

Criminal Investigation and Policing Studies BA (Hons)

This programme explores the criminal justice system, its legislative context and the leadership and management of contemporary issues in policing.

Education Studies BA (Hons)

This course engages you in current debates on the contemporary approaches and methods used in teaching, learning and educational wellbeing. Graduates go on to Initial Teacher Training and to work in sectors including library and museum services, policy-making and the creative industries.

Degree in Professional Policing BA (Hons)

This programme is licensed by the College of Policing and prepares you to apply to the Police Service in England and Wales as a Police Constable.

Psychology BSc (Hons)

This course is accredited by the British Psychological Society (BPS), which ensures your learning remains relevant to the latest developments within the sector. You will explore research and theories about the human mind and behaviour using sound scientific methodology to understand how and why people function in the way they do.

Social Work BA (Hons)

Approved by Social Work England, this course trains you to be a confident and effective practitioner. You will learn to work with both adults and children and will take your learning beyond the classroom with a variety of practical work experience placements.

Facilities

Our teaching centres on real-life experience and offers facilities such as a dedicated crime-scene house that mimics crime scenarios. Psychology resources include psychological testing facilities, experiment-building software, psycho-physiological apparatus – including eye-trackers – experimental cubicles and interview rooms.

Teaching and learning

Our academic staff are experts in their field. They are committed to providing you with a learning environment that will support you to develop the knowledge and skills that graduate employers value. Many of our academics have worked in professional practice and have excellent links with a range of local and international partners, ensuring you have access to the most up-to-date knowledge as you prepare for your career.

Careers

You will have opportunities to undertake placements that reflect your degree, including in schools and community centres, housing projects, NHS hospitals and the HM Prison and Probation Service. Our graduates go on to careers in teaching, youth work, community development, policing, youth justice, social work and more.

Visual Arts

Founded in 1870, the Leicester School of Art is the first element of what became De Montfort University. Today, our visual arts courses continue our ethos of encouraging students to express and develop their creativity within a supportive and experimental environment.

We encourage an open-ended spirit of enquiry and collaboration across disciplines, enabling you to produce thought-provoking and dynamic work. You will develop employability skills to prepare you for a range of rewarding careers in the creative industries.

Art and Design Foundation Diploma

This year-long course will help you improve your skills across a wide range of art and design subjects, helping you to decide which degree course is right for you. You will build a strong portfolio of work before you start your degree, so you can hit the ground running and realise your full potential. You will be introduced to at least 10 different workshops, exploring both traditional and contemporary techniques. You will discover where your strengths and passions lie by experimenting with processes, materials and ideas.

Fine Art BA (Hons)

This course has been studied in Leicester for over 150 years and has an established reputation for quality and creativity. You will have the flexibility to experiment across a range of specialist disciplines such as digital media, drawing, installation art, painting, film-making, sculpture, printmaking, performance and photography. You will have access to individual studio space and well-equipped workshops which cover all practical aspects of the course.

Photography BA (Hons)

Evolve high level creative and technical skills that will give you all the tools you need to develop your career as a creative and commercial practitioner. Whether you aspire to advertising, fashion or documentary photography, or see yourself as a gallery practitioner, this dynamic and contemporary course will enable you to produce thought-provoking work as you explore a range of approaches to both still and moving image.

Facilities

Our award-winning Vijay Patel Building brings all of our visual arts courses together into a contemporary setting. The building reflects DMU's commitment to creative education, where we hope to provide you with all the tools you need to realise your true potential.

You will benefit from using our extensive range of specialist facilities. We have 25 industry standard workshops such as ceramics, glass making, fine art printmaking, metalworking, sculpture as well as state-of-the-art digital video editing suites, video and stills studios, digital imaging labs and a traditional black and white darkroom. All of our facilities are supported by a team of excellent technical staff who will encourage you to express your artistic individuality across a wide range of areas.

Laura Holmes, Fine Art BA (Hons)

Careers

We embed employability and professional practice throughout your studies, including an introduction to studio practice, contextual and professional studies and presentation.

Using your skills, you'll be prepared for a range of creative careers shaping the future direction of the industry. Our graduates have forged successful careers as artists and freelancers in theatre design, film and television, publishing, gallery management, curation, and crafts. They work for brands such as Sky, Paul Smith and Vogue.

Awards and showcasing

Leicester is a city buzzing with creativity – from colourful street art by GraffWerk and the annual Leicester Art Week to the augmented reality art trail and DMU's own Leicester Gallery.

Our partnerships in the city create opportunities to showcase your work, including at LCB Depot, Leicester's creative hub. Join the long list of students who have exhibited at Handmade Festival, Two Queens gallery, Attenborough Arts Centre and a host of other prestigious venues.

Teaching expertise and industry links

We have excellent industry links, ensuring you work on relevant projects and clients briefs to build your experience and external reputation. You will be taught by academic staff and technicians who have worked in professional practice or are researching the latest developments in their field, bringing this expert insight into your learning. There are opportunities to engage with the arts community through events that feature renowned artists, respected research scholars and alumni.

We work with practitioners to shape our courses, and you can take part in live projects set by organisations such as the National Space Centre and the Handmade Festival of Art and Music.

How to **find us**

DMU is located in the city of Leicester, in the centre of England, and is well-served by excellent transport links. High-speed trains connect Leicester to London in just over an hour, and other major UK cities such as Nottingham and Birmingham are close by and can be accessed by train, bus or coach.
